

# CHRISTMAS PICTURE BINGO GAME

*Christmas Picture Bingo is a simple Christmas game where the aim is to complete your picture first to win the game. You get to complete your picture by adding the correct Christmas scenery so your picture is completely filled in.*

**Age range:** Pre-Kindergarten +

**Number of players:** any number

**Learning:** Counting the number of spots on one dice; recognise numbers to 6

## **You will need**

- A copy of a blank picture board for each player (there are 2 separate boards to choose from).
- A copy of each colored part of the board – background and animals all cut out, ready to use, for each player.

## **Instructions**

- Each player starts the game with a board containing the background only.
- The Christmas pieces are placed face up beside the boards.
- Player 1 rolls the dice.
- Player 1 then takes the relevant Christmas object for their roll, and places it on their board. If Player 1 has already got this on their board, then it is the next player's turn.
- Please note: the front door can only be taken after the front of the house.
- Once a player has completed all of their board, they win the game.

## **Example**

If you roll a 2, you get to pick out either the yellow sun.

If you roll a 4, you get to pick out the black roof.

If you roll a 6, you get to pick out the blue front door (only if you have already got the front of the house).

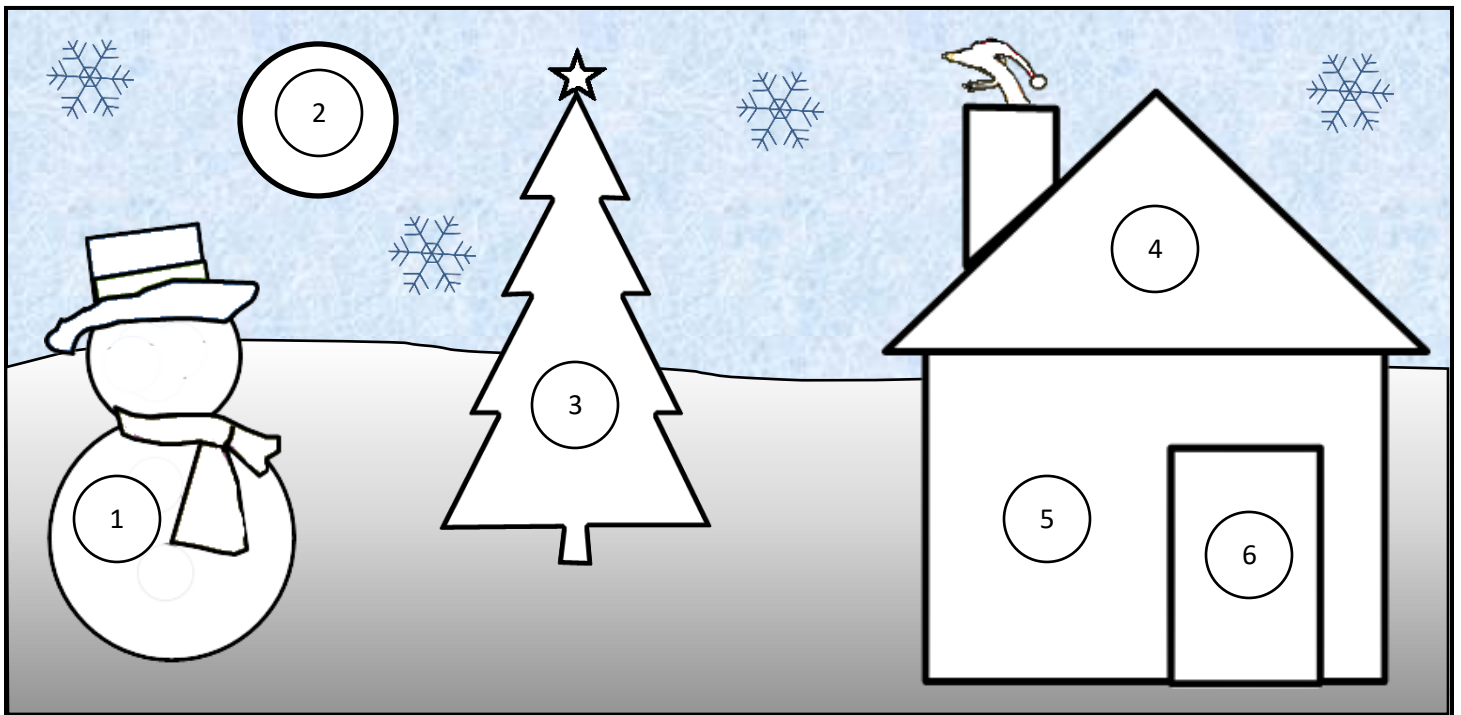

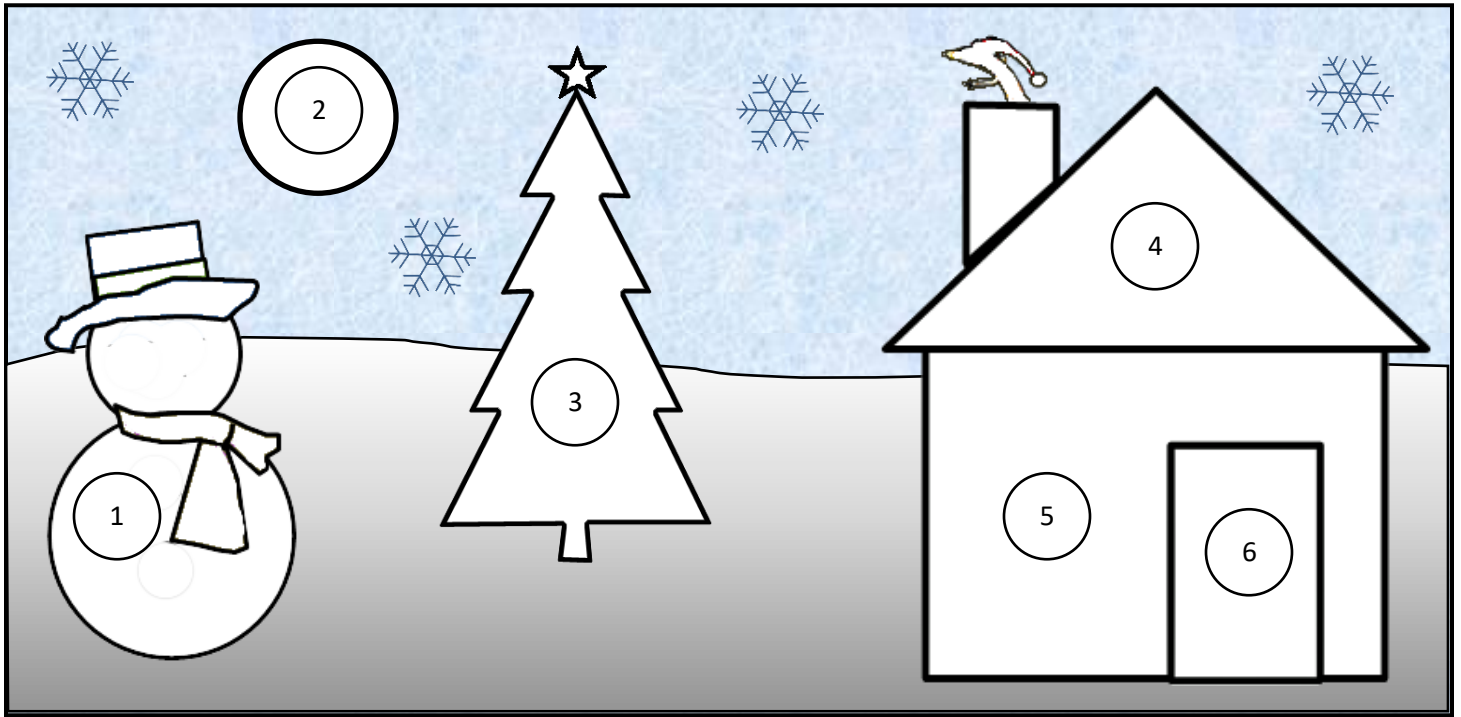

## **Variations**

- If you already have the object on your board, roll the dice one more time and see if you can get an object you don't already have.
