Supplementary Figure S3. Comparison of the relative amounts of GSSG and GSH metabolites in SAMP1/kl-/− and HL156A-treated SAMP1/kl-/− mouse kidneys. Columns represent the relative areas, and numbers represent the ratios of the relative amounts of metabolites in SAMP1/kl-/− vs. SAMP1/kl+/+ or HL156A-treated SAMP1/kl-/− vs. SAMP1/kl-/− samples.
