

Build Your 3D Strategy

Hexa is able to turn 2D images into 3D models for you by combining advanced tech for scale and human artists for precision. If you are a business looking to create hundreds of models every month, we know how to do it.

Connect ROI and 3D Content

With Hexa, you get instant measured ROI on any product – we cover the model production cost and you pay only when the model is used for sales uplift.

ROI Guaranteed

Hexa's business model is based on success. Pay only when your 3D content is viewed by consumers, and don't pay for 3D asset production costs.

Each Month, Create 2,000+ Models

Our 3D artists work with AI-backed technology to create hundreds of high-quality models each month.

Network for Content Distribution

Use our network to get free access to 3D content generated by our partnering brands.

3D Asset Production Made Simple

1 Request Your 3D Asset

Create your request by attaching a product page URL, uploading 2D design sketches, or by connecting an API. You can easily create multiple requests in minutes.

1

2 Hexa Generates Your 3D Asset

Our global pool of 3D artists, enhanced with AI will create the 3D models for you, followed by 3 layers of human QA.

2

3 Add Your Assets to Your Online Store

We tailor our technology to enable a seamless integration of your 3D assets into your platforms.

3

	Hexa	Competitors
3D Production Cost	No upfront costs, pay per view.	150\$ per asset (avg).
Manufacture time	Fast and flexible production pipeline, allows for the manufacturing of short LTV products.	Smaller teams and lack of AI technology results in longer and slower manufacturing of 3D assets.
3D Assets Quantity	2,000+ 3D assets produced per month.	~60 assets produced per month.
Viewer	A plug-and-play viewer with fast loading times and minimal maintenance requirements.	Additional expenditures on research and development resources, 3D asset management storage and maintenance, plus tech support may be required.
Distribution	Brands looking for a traffic channel that distributes content for their resellers can use Hexa, which offers a distribution.	Additional distribution costs and services may be required to properly disseminate 3D content.
Additional technologies	Models are compatible with all common technologies and come in a variety of file types.	Models are created in one format only and to be used by specific technology only.

Hexa's Secret Sauce

Hexa uses its platform to connect proprietary algorithms, the world's largest retail 3D database and a community of over 5,000 3D engineers around the globe, to lower the amount of time, money, and set of skills it takes to create immersive content.

As such, it is able to cover the initial capital its takes to create immersive content and provide its retail partners with an easy way to create, scale and distribute their immersive content, on a global scale.
