Presentation

About us

We digitalize and simplify business processes with custom-built cloud solutions, low-code technologies, and user-friendly apps for smarter collaboration.

Vision

We help organizations digitalize and optimize their operations by delivering tailor-made, 100% cloud-based collaborative software, apps, and solutions.

This enables teams to work more efficiently and effectively, while the organization modernizes step by step, optimizes costs, and creates lasting value through continuous improvement.

- Accelerate your digital transformation with custom cloud solutions and innovative technologies for sustainable success.
- Build the future of your business with smart, step-by-step, tailor-made collaborative software powered by advanced technology.
- Your trusted partner in digital transformation: enabling efficient collaboration, delivering custom cloud solutions, and driving innovation and sustainable business improvement.
- Efficiency, collaboration, and growth, your digital transformation starts here.

Mission

We strive to become a market leader in modernizing and optimizing business processes through cloud-based collaborative SaaS and low-code solutions. By providing organizations with powerful tools, expertise, and training, we empower them to work more efficiently, continuously improve, and achieve lasting success.

- Unlock your company's potential with custom cloud-based collaborative low-code solutions for lasting impact.
- Empowering your business units to connect, collaborate, and excel with Quivvy, your partner in custom cloud, low-code & SaaS solutions.

What we offer

Custom software

Mobile applications

Connecting software

Custom software

At Quivvy, we create custom solutions that perfectly fit the way you work. As an **Airtable Gold** Partner, we develop and automate powerful workflows on top of a flexible and reliable platform. No off-the-shelf solutions, just smart systems that truly make a difference.

Efficiency

Digitalize and automate repetitive processes to free up time and resources.

Scalability

Start small and grow with the modular structure of Airtable.

Ownership

Maintain full control over your data and solutions, without relying on third parties.

Mobile applications

A mobile app is often the direct point of contact with your user. With [FlutterFlow](#), the framework we specialize in, we quickly build high-performance and user-friendly apps for both iOS and Android. Visually striking, flexible, and fully customized.

Accessibility

Always accessible through a single intuitive interface, regardless of the device.

Engagement

Increase engagement with real-time notifications, personalized flows, and interaction.

Speed to market

Thanks to FlutterFlow, we develop faster without compromising on quality.

Connecting software

A modern software landscape stands or falls with connectivity. With **Make**, we connect tools, automate data flows, and carry out migrations without disrupting daily operations. The result? One integrated ecosystem.

Connectivity

Connect different systems into a single coherent whole, without data silos.

Continuity

Migrations are carried out in phases and securely, ensuring everything continues to run smoothly.

Automation

Enable systems to communicate with each other and minimize manual work.

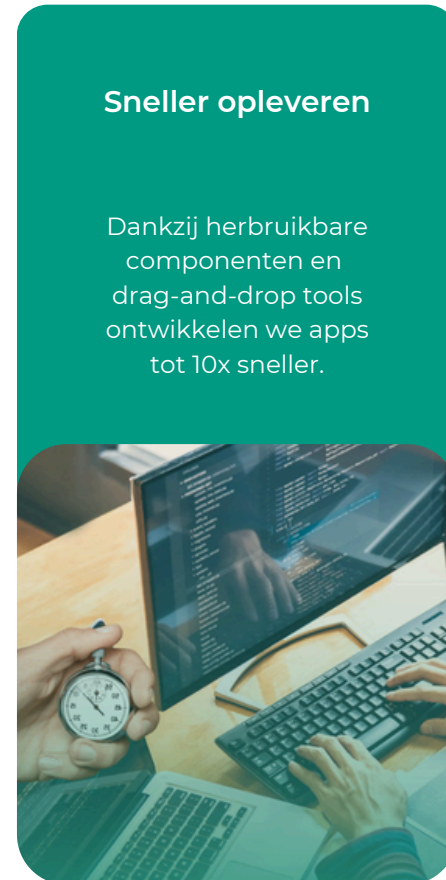

In addition to using Make, at Quivvy Solutions we also connect systems via API integrations, allowing different platforms to communicate seamlessly. This way, we automate processes, synchronize data in real time, and increase your organization's efficiency.

Low-code Development

Low-code development allows us to build applications faster and more **cost-effectively** by using visual development tools and reusable components.

This enables us to execute projects with less manual coding, reduce errors, and respond more **quickly** to market changes, while significantly lowering development costs.

This is **the future** of software development: faster, more flexible, and more efficient than ever.

Sneller opleveren

Dankzij herbruikbare componenten en drag-and-drop tools ontwikkelen we apps tot 10x sneller.

Kostenbesparend

Minder handmatige codering betekent lagere ontwikkelkosten en efficiëntere projecten.
