Shopify Connector for NetSuite by Tavano Team

Seamlessly integrate your Shopify store with your NetSuite ERP.

What it includes

- Installation and Setup
  - Bundle installed natively in NetSuite.
  - Custom records created for Shopify configs.
  - Data mapping: Shopify < > NetSuite.
  - Initial data migration: Items, Inventory, Customers, Orders.
  - Schedule-based and real-time sync options.
- Real-time Flows
  - Sync Customers and Orders from Shopify to NetSuite.
  - Export items, inventory levels, and fulfillments from NetSuite to Shopify.
  - Sync refunds and cancellations from NetSuite to Shopify.
  - Sync NetSuite custom fields to Shopify metafields.
  - Optional: Import Fulfillments from Shopify to NetSuite.

Leverage the full capabilities of Shopify within NetSuite

Purpose-built Solution for Connecting NetSuite ERP and Shopify Seamlessly

Why is it different?

Unlike third-party solutions, our Shopify Connector is developed 100% natively inside NetSuite.

That means:

- Full visibility and traceability of your data.
- Easier to customize and maintain.
- Aligned with your existing NetSuite workflows.

Who is it for?

Shopify merchants running on NetSuite ERP who want to:

- Simplify operations.
- Automate sync across platforms.
- Eliminate third-party dependency.
- Scale with a secure, future-proof integration.

Direct connection

Real-time data sync

Built into NetSuite

No third-party elements

About Shopify

Shopify is a powerful and flexible commerce platform trusted by millions of businesses worldwide.
Its rich features and scalable ecosystem make it ideal for fast-growing B2C brands.

Why should you trust us?

Tavano Team is an award-winning, leading eCommerce digital agency, and long-time partners of Oracle-NetSuite. Their team of NetSuite Professionals will set up the sync between NetSuite ERP and Shopify seamlessly, without third-party elements.
