

DEMONSTRATE COMPLIANCE. BUILD LASTING TRUST.

360 Advanced delivers integrated audit and compliance assessment services across a broad range of security frameworks and regulatory standards, combining multiple engagements into one streamlined program that reduces cost and complexity.

Our Story

360 Advanced was built around relationships, not frameworks.

Founded by cybersecurity and compliance professionals from leading consulting firms, we saw organizations struggling with fragmented audits, conflicting guidance, duplicate testing, and rising costs.

Today, we help more than 900 organizations navigate cybersecurity, privacy, and compliance requirements through an integrated approach that reduces complexity, improves efficiency, and creates greater value.

Our mission remains simple: build trust, demonstrate compliance, and enable growth.

Why an Integrated Approach Matters

- One point of contact across all frameworks reduces coordination overhead and cost
- Shared control testing across engagements reduces total time and scope
- A single team that understands your full environment improves depth and quality
- Integrated scoping ensures each framework maps cleanly to the next
- Fixed fees provide budget predictability with no hidden costs or scope creep

WHY 360 ADVANCED

- 100% U.S.-Based Audit & Assessment Teams
- One Partner Across SOC®, ISO, HITRUST®, PCI, FedRAMP® & More
- Practical Readiness Guidance Without Compromising Independence

- 8 Full-time CPAs on Staff

360 Advanced Audit & Assessment Services

SOC Examinations

AICPA-standard reports establishing trust for service organizations across financial, security, and processing integrity controls.

- SOC 1: financial reporting controls
- SOC 2: security, availability & confidentiality
- SOC 3: public-facing seal of assurance

Highly-Regulated Industries

Assessments for healthcare regulations and security frameworks required by regulated industries and enterprise clients.

- HIPAA/HITECH: protected health info
- HITRUST CSF: unified multi-standard framework
- PCI DSS: cardholder data (QSA firm)

Federal, Government & ISO

Authorizations and certifications for organizations serving federal agencies, government entities, or requiring internationally recognized standards.

- FedRAMP: federal cloud services (3PAO)
- GovRAMP: state & local government
- FISMA: federal security requirements
- ISO 27001/27701/42001: via Compass Rose

Compliance Frameworks

SOC 1	SOC 2	SOC 3
Examination	Examination	Examination
HIPAA / HITECH	HITRUST	PCI DSS
Assessment	Assessment	Assessment
FedRAMP	GovRAMP	Penetration Testing
Assessment	Assessment	Assessment

EVERY ENGAGEMENT INCLUDES

Pre-Assessment Readiness Guidance

Gap analysis and preparation support before formal testing begins – reducing surprises and rework.

Dedicated Account Team

A consistent team that learns your business and stays with you across all engagements and annual renewals.

Structured Phases & Weekly Updates

Clear milestones, regular status calls, and a collaborative Q&A process throughout each engagement.

Fixed Fees & Year-Round Support

Transparent pricing with no hidden charges, plus year-round consultation access between engagements.
