

How to Connect Beds24 to Pricepoint

Easily integrate Pricepoint with Beds24 to automate your pricing strategy and boost revenue with real-time, AI-powered rate updates.

This guide walks you through connecting Beds24 to Pricepoint so that Pricepoint can import your properties and booking data and optimize your pricing in **real time**.

General Information

Pricepoint is an **AI-native pricing intelligence platform** designed for the hospitality industry. It automatically manages your prices in real time to optimize revenue and occupancy — without manual effort.

This integration enables a direct connection between Beds24 and Pricepoint, allowing Pricepoint to receive property and reservation data live and instantly adjust your prices accordingly.

If you need assistance with the setup, please contact us at support@pricepoint.co.

Capabilities

Once connected, Pricepoint will:

- Import historical and live reservation data from Beds24
 - Automatically set **daily prices** and **minimum stay rules**
 - Continuously optimize pricing in **real time**
-

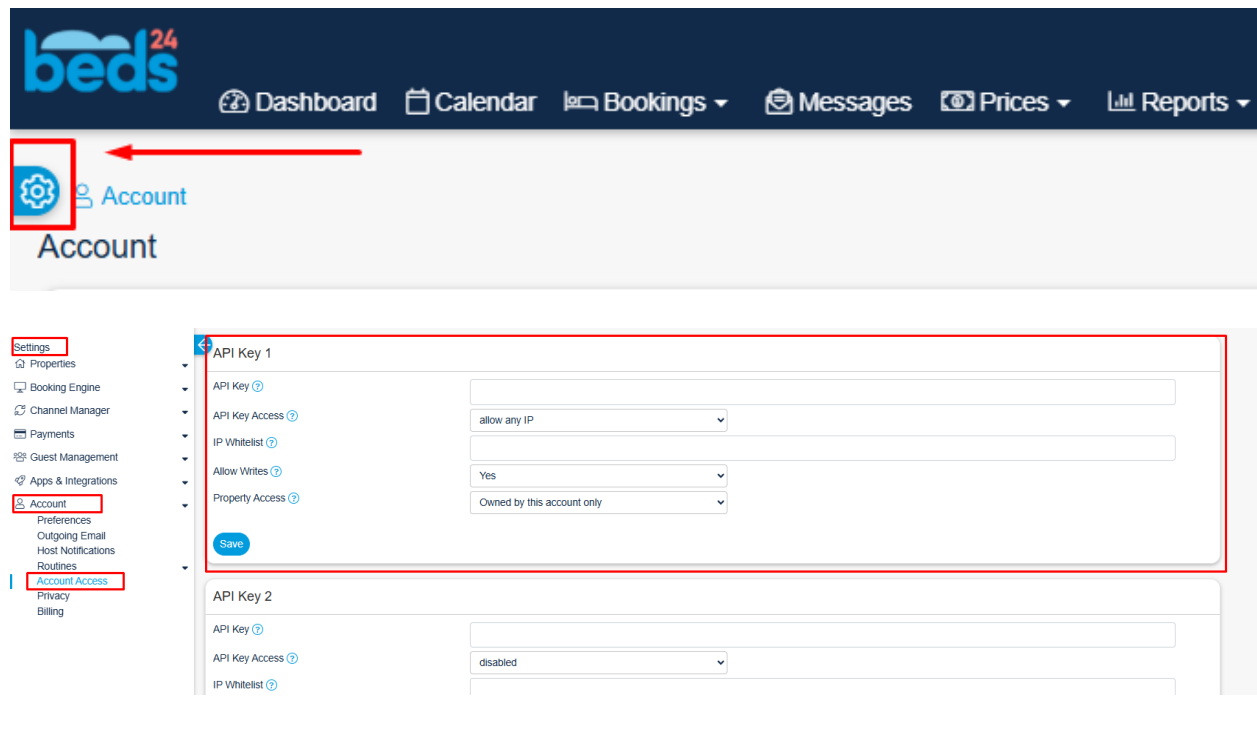

Setup Instructions

Follow these two steps inside Beds24 to enable the connection:

Step 1: Create and Configure an API Key

1. Go to  **SETTINGS > ACCOUNT > ACCOUNT ACCESS**

2. In the **API Key** field, create your own custom key (minimum 16 characters).
Example: pricepointAPI123456
3. Set the following options:
 - **API Key Access:** allow any IP
 - **IP Whitelist:** (leave blank)
 - **Allow Writes:** Yes
 - **Property Access:** Owned by this account only
4. Click **Save**

Step 2: Define a Property Key (propKey)

1. Go to **SETTINGS > PROPERTIES > ACCESS**
2. In the **propKey** field, define a **unique key** for each property
 - Must be **at least 16 characters**
 - Must be **different for each property**
 - You choose the value (e.g. propPricepoint123456)
3. Click **Save**

How It Works

Once connected:

- Pricepoint will retrieve historical reservation data.
- All future bookings, cancellations, and modifications are **synced in real time**.
- Pricepoint uses this data to continuously optimize prices throughout the day.

Final Step: Send the Keys to Pricepoint

Once your API Key and propKey(s) are saved, please email them to:

 onboarding+beds24@pricepoint.co

Our onboarding team will complete the integration and confirm when your account is fully connected.
