

Website Accessibility Services

Aiming for **Compliance & Beyond.**

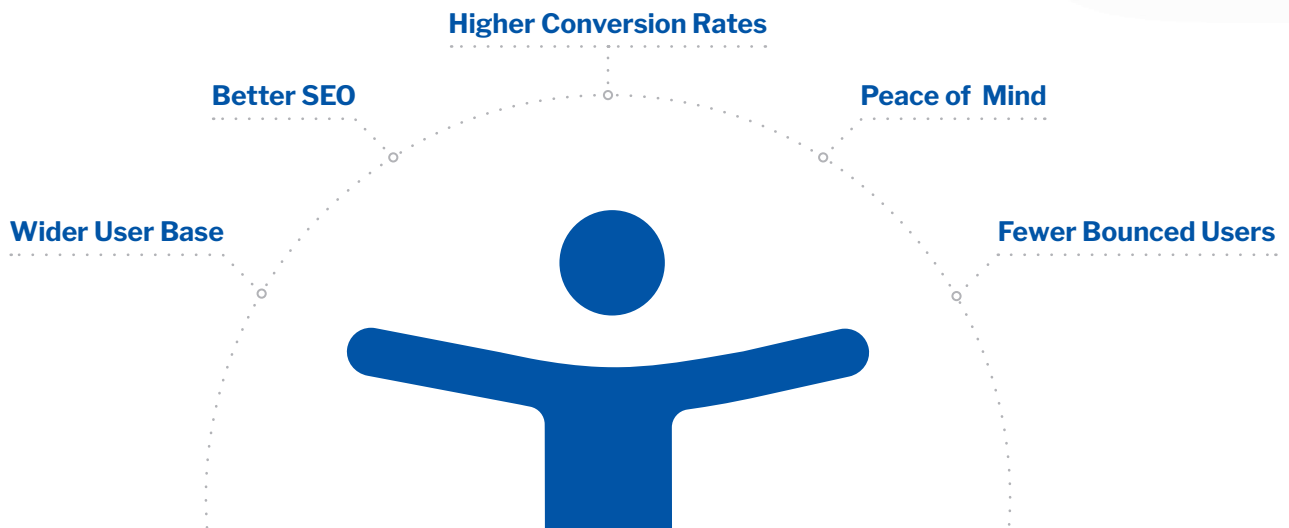

The goal of web accessibility is to make websites available to everyone, with an emphasis on including those with disabilities. Making your site accessible can help you to reach your full market potential while also helping to avoid possible legal entanglements. Americaneagle.com has the right expertise and experience to work with you on your journey to accessibility.

Common Issues

- Content readability with ample contrast ratio & font sizes
- Accurate image labels & alternative text
- The ability to navigate pages without a mouse
- Ways for users to skip redundant navigation
- Transcripts & audio descriptions for media
- Correct heading & labeling structures for pages, forms, & data tables
- Error messaging & instructions for functionality to help reduce confusion

With an accessible website,
you can benefit from:

How Americaneagle.com Can Help

We have web accessibility experts on staff to help you incorporate best practices outlined in the latest Web Content Accessibility Guidelines into your website. We will perform an assessment that empowers you to address potential issues and then work with you to incorporate the design recommendations outlined in WCAG so you don't lose out on potential customers.

We offer:

- ✓ Accessibility Tests and Assessments
- ✓ Remediation Services
- ✓ Consulting and Training
- ✓ Ongoing Maintenance and Support
