

Strategy & Insights

Defining Your Digital Transformation

At Americaneagle.com, strategy is at the core of what we do. Our team of digital strategists and subject matter experts take a fundamental look at every aspect of your business to develop a roadmap and design that maximizes your success. By placing the motivation, behavior, and needs of your audience at the forefront, we can create an effective digital presence that moves the needle and produces results.

We are data-driven, technical professionals who are committed to your digital journey.

Our Expertise

A clear plan that can be executed in structured stages is crucial to ensuring your digital success. Each step in our digital strategy process informs the next, allowing us to design and build a solution that works.

Technical Strategy

01. Diving into the high-level technical requirements and constraints to shape an implementation roadmap for your project.

Foundational Strategy

02. Understanding your goals, defining your audience and determining how you measure success.

Content Strategy

03. Assessing your existing messaging and tailoring it to your audience to develop content that converts.

Information Architecture

04. Developing a framework for your website's organizational structure, content, and navigation to maximize usability and findability.

Development Documentation

05. Creating a detailed product backlog for our team of programmers to build a solution that meets your objectives.

“  Samaritan Health Plans

We were eager students and the Americaneagle.com team proved to be effective teachers and strategy-driven partners, opening up a new world of possibilities for us. While our new sites boast many new features that are proving to be extremely effective sales tools for our statewide network of brokers, it is the potential for offering tailored, online experiences to our varied customers which holds forth the greatest promise. We thank our collaborators at Americaneagle.com.
