

Modall

Company Overview

Modall is a full-service software development agency. Our team handles all development entirely in-house at our Toronto location. As a result, there are no language barriers, no time zone differences, and no headaches when working with us. You get a highly skilled team directly building your product from start to finish.

Services we offer

From MVPs and SaaS platforms to ERP systems, we design and build software that addresses your unique needs.

Whether you're a startup entering the market or an established company streamlining operations, we deliver solutions tailored to your goals, workflows, and industry requirements.

Want to accelerate software development at your company?

CLIENTS

We've worked with innovative startups and enterprises

 **ShopTweak**

 **High Clean Pro**

 **tfi**

 **PizzaForno**

 **Hyper Speed**

 **BIG GUPPY MEDIA**

 **RIDER**
TOOL & MANUFACTURING CO.

 **MG CONSTRUCTION**

“Jake and Ryan are a dynamic duo of development brilliance. They have implemented both consumer facing campaigns and backend platforms for PizzaForno at breakneck speed. Cannot say enough positive things about them and Modall.”

Les Tomlin

President & Co-Founder, PizzaForno

“I can honestly say that I have never worked with a better front end development team than Modall. We wholeheartedly knew that the whole platform, from the user experience, UI/UX and the front end components were just completely handled by Ryan and the team over at Modall and that we would be able to kind of work side by side and the communication was constant and at all times seamless, professional and effective. I could not speak highly enough about the whole experience with Modall.”

Callum Toner

Head of Engineering, NMT Investment Platform

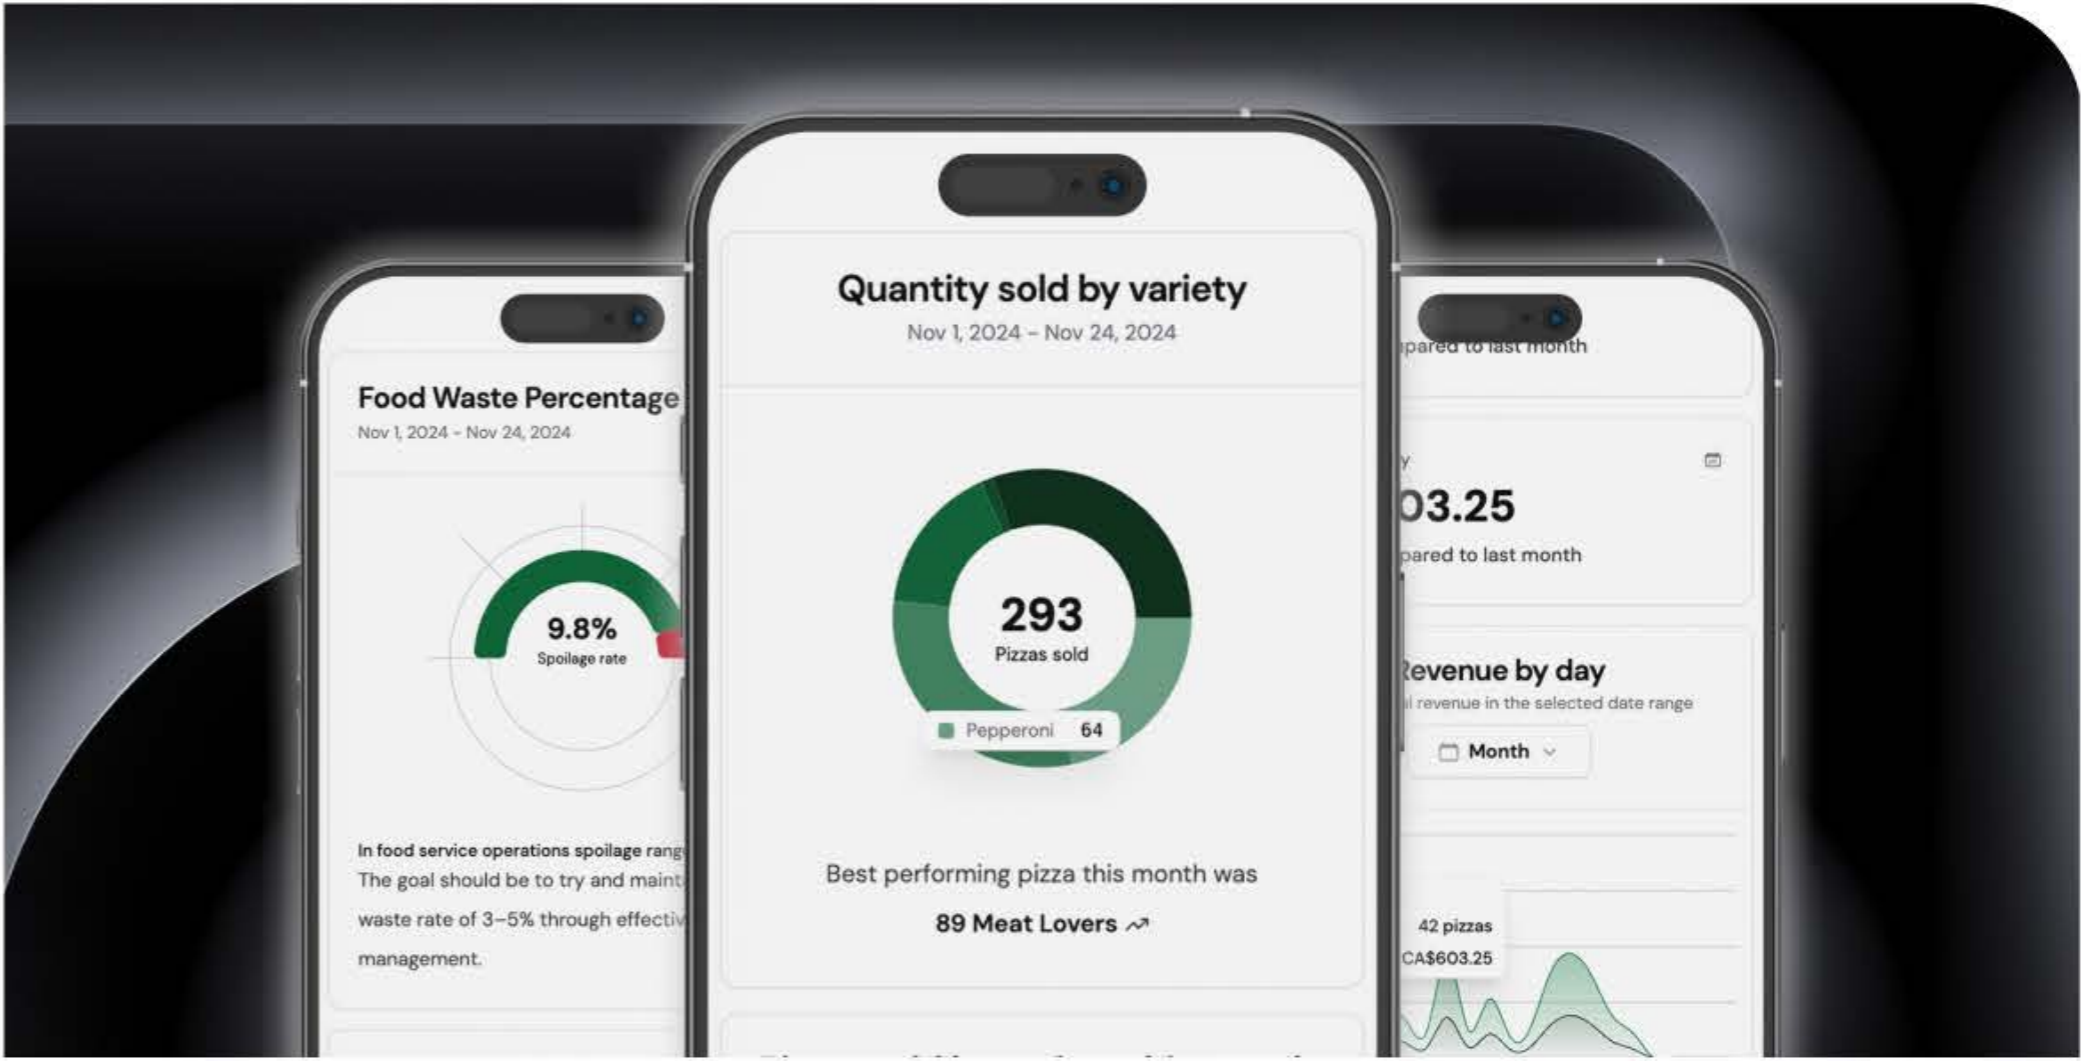

“I can't say enough about my positive experience with Modall. What truly set them apart was the level of personal attention, especially from Jake, who was always available to help, even working after hours and answering texts and calls around the clock. Their team is not only professional and highly skilled but also genuinely friendly and dedicated to ensuring their clients are taken care of. I'm so grateful for their hard work. I highly recommend Modall!!!”

Anthony Bartelli

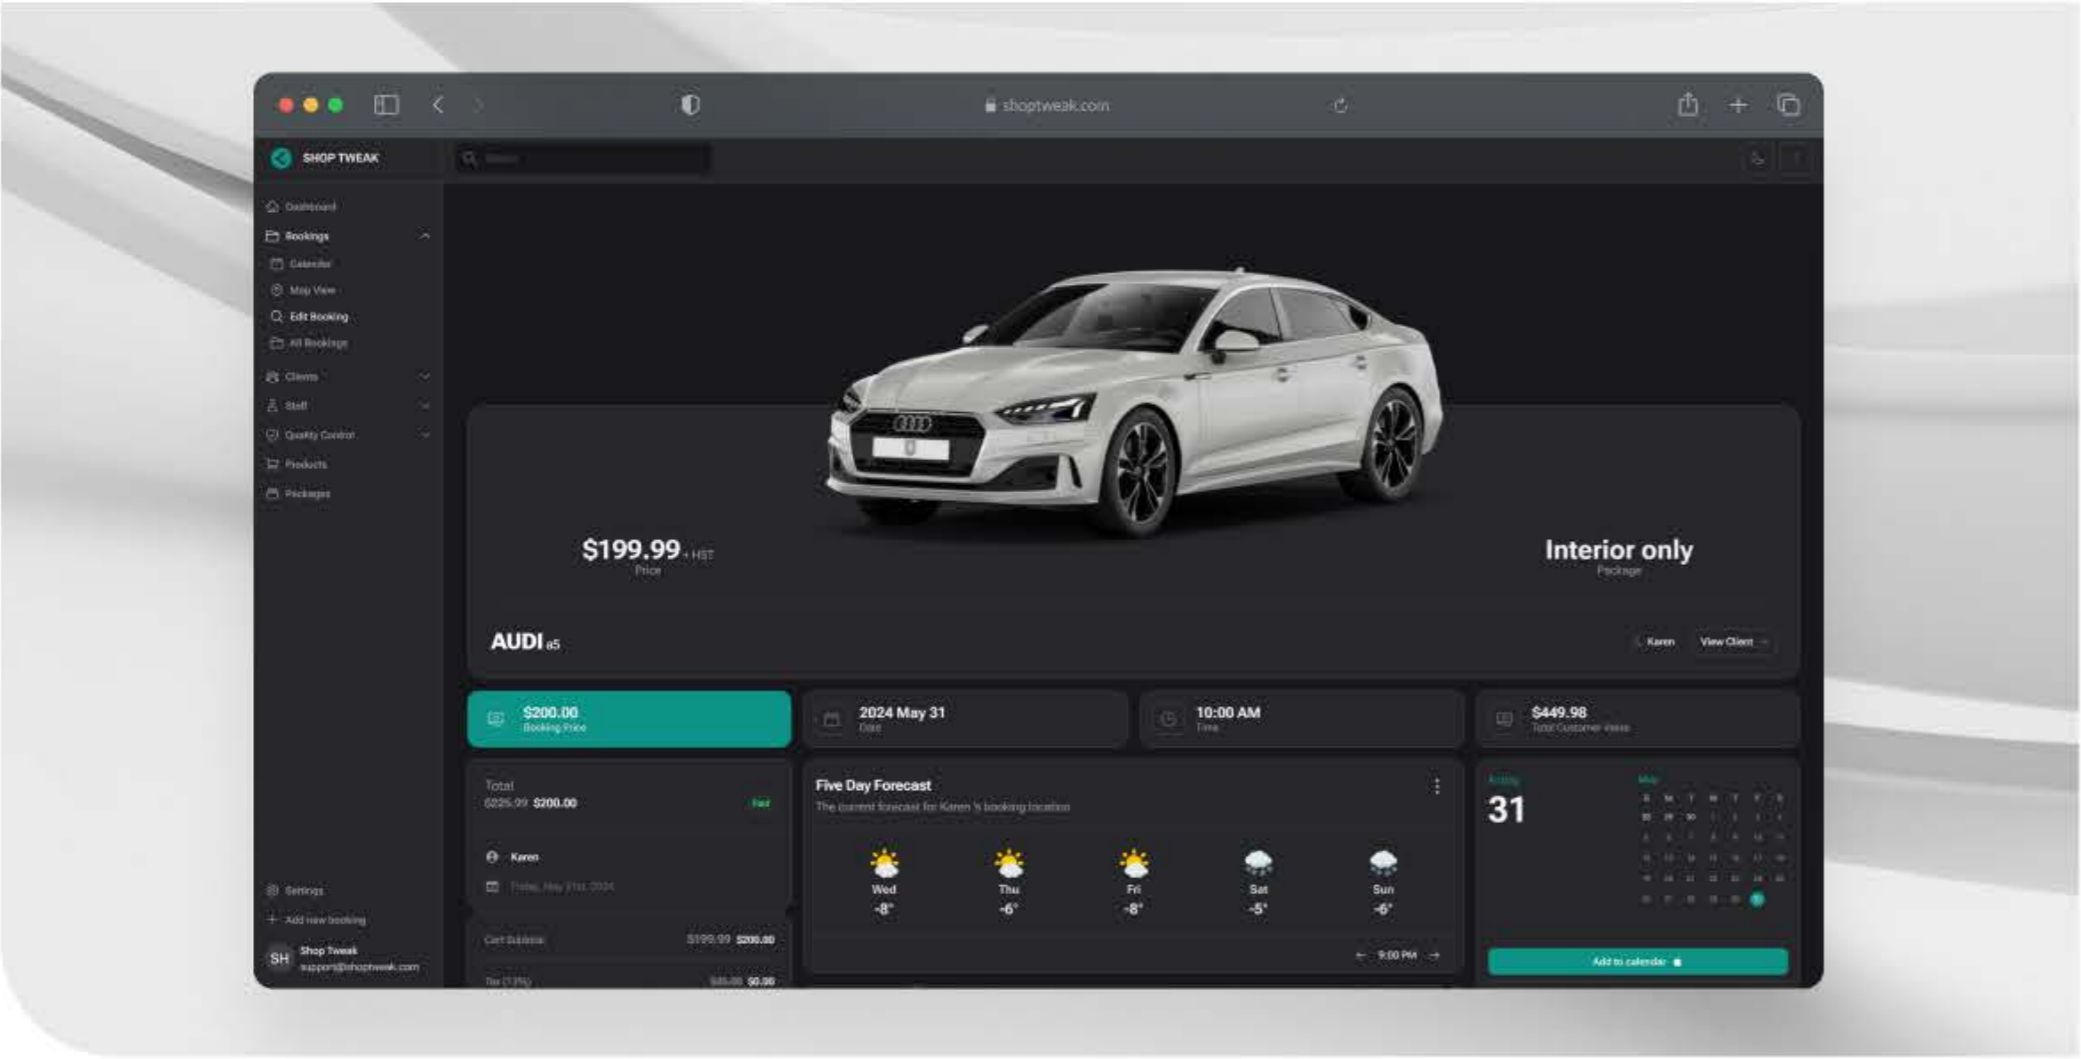

CEO, Big Guppy Media

Client success stories

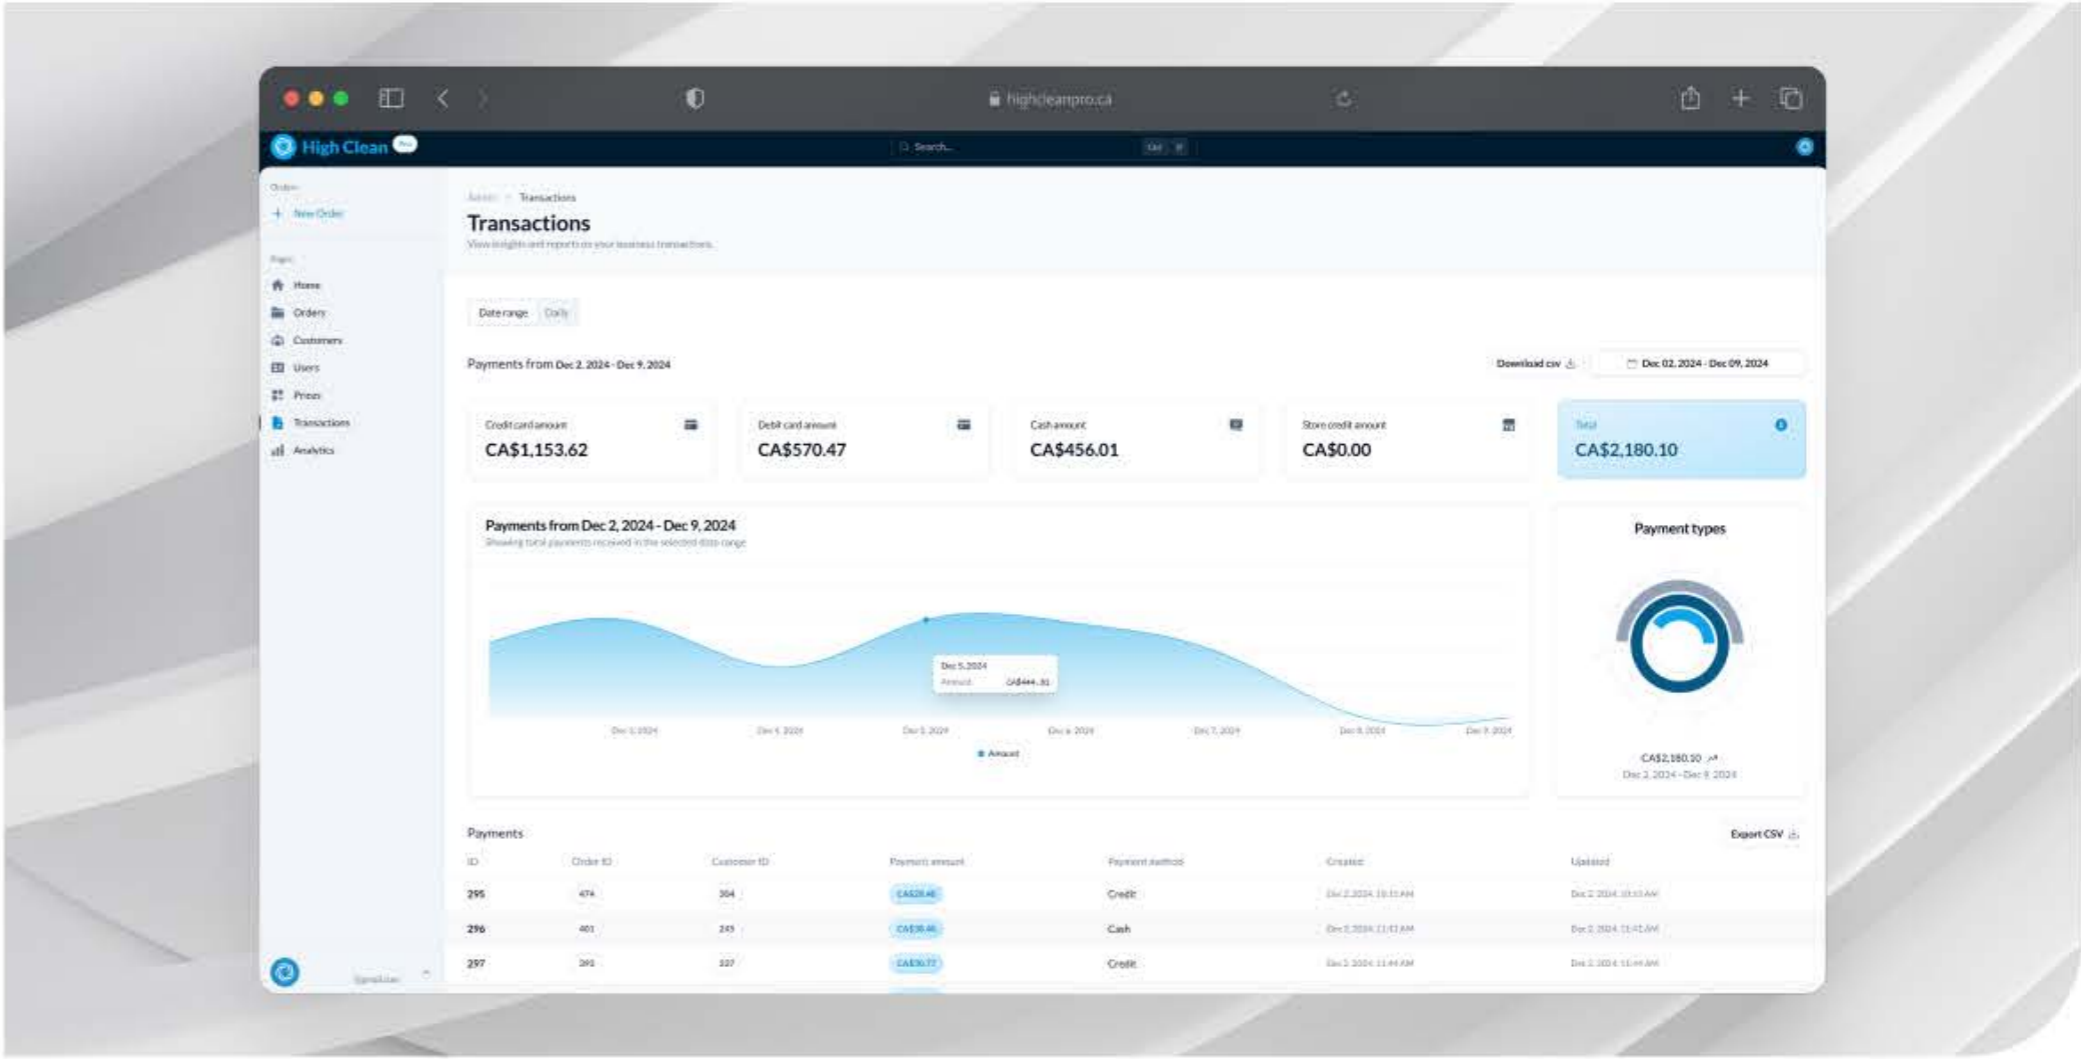

We believe that the best software comes from understanding people, not just code. That's why we prioritize communication and collaboration, working with you to identify challenges, refine your vision, and develop software that perfectly aligns with your goals.

NEXT.js

“The Modall team is absolutely amazing to work with, would highly recommend!”

Nicole Campo
Director of Customer Care, TFI Canada

Engagement Models

Our engagement model operates on flexible monthly contracts, tailored to your project's scope, timeline, and budget. Pricing varies based on factors like turnaround time, project complexity, and resource allocation.

We can serve as your dedicated technical partner, managing the full lifecycle of your project—from development to continuous improvements and ongoing support.

Alternatively, we can integrate with your existing team, offering additional resources and expertise to accelerate development.
