Generation Digital helps teams unlock real value from their tools

We combine deep product knowledge with a sharp focus on people, process, and performance. Our specialists work alongside your team to design and deliver scalable, user-friendly solutions that turn your software into serious business outcomes.

Our Capabilities

Innovation

Introducing smarter ways of working with emerging tech

Strategy

Aligning tools and teams to drive real impact

Technology

Embedding best practice for setup, workflows, and governance

Growth

Helping organisations scale with data, insights and support

Experience

Improving adoption through clarity, confidence, and delight

How does it all work?

Generation Digital deliver time-bound, outcome-driven service packages designed to help enterprise teams get the most out of their software stack. Whether you're rolling out a new tool, fixing workflow chaos, or scaling success across the business, we embed ourselves in your team to make sure you see real progress—fast.

How we work

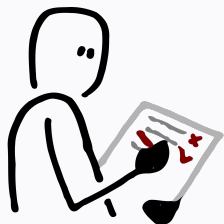

Our support typically falls into two categories:

- **Onboarding Projects**
Short, focused delivery (10–20 hours) designed to accelerate setup, improve structure, and get teams collaborating confidently
- **Advisory Engagements**
Outcome-led work packages (20–80+ hours), often on a retained basis. We operate as part of your team—either full time (40 hrs/week) or part time (20 hrs/week)—over 3, 6 or 12 months, depending on scope and complexity.

Who delivers it

Our services team brings a mix of technical depth and strategic thinking to every engagement:

- **Adoption Leads**
Specialists in change, enablement, and user behaviour. Ideal for long term advisory work where adoption and transformation are a priority.
- **Platform Architects**
Technical experts focused on governance, configuration, integrations, and migration planning. Perfect for teams scaling or modernising.
- **Onboarding Consultants**
Focused on helping teams get value from day one. Handling setup, workflows, and users experience to ensure nothing slows you down.

Onboarding Services

Our onboarding packages are designed to get your teams up and running quickly, with the right setup, structure, and user confidence from day one. We focus on eliminating friction and accelerating time to value.

Duration: 10–20 hours

Delivery: Short-term, project-based engagement

Examples of Offerings:

- Workspace configuration
- Team and user onboarding
- Governance and permission setup
- Process mapping and workflow templates
- Hands-on training sessions

Advisory Services

Advisory engagements provide deeper, long-term support. We embed with your team to guide adoption, improve processes, and deliver measurable outcomes over time.

Duration: 20–80+ hours or ongoing over 3, 6, or 12 months

Delivery: Retained support on a part-time (20 hrs/week) or full-time (40 hrs/week) basis

Examples of Offerings:

- Workflow optimisation
- Cross-functional rollout planning
- Integration scoping and advisory
- Centre of Excellence setup
- Change management and enablement strategy

Take the next steps to success

Let's explore how we can help.

- 1) Book a Discovery Session**
