

Tax Support

Comprehensive tax services for startups and SMBs.

Managing taxes for a company is more complex and risky than managing personal taxes. Startups have to follow special rules for accounting, including depreciation, net operating losses, and tax credits such as jobs credit and R&D tax credit. You need experienced tax professionals who understand your unique needs to navigate this complexity.

Escalon's tax team has extensive experience working with startups and can help you find all the potential tax credits you qualify for, minimize your tax burden, and maximize your profits. As a trusted partner for 18% of the venture-backed startups in the U.S., Escalon can get it Done for your company, too.
