

We don't just take care of your finances, **we optimize them.**

As a small- or medium-sized business, a thorough understanding of your company's financial state is crucial for growth. FinOps Done puts everything you need to be confident about your business' financial picture into an all-in-one package. From tech-driven processes that cut

time, energy and mistakes from the minutiae of billing to experienced CFOs who deliver knowledgeable and strategic guidance, Escalon delivers it all so you can consider it Done.

Your CFO™

The numbers alone can only get you so far. To make sure your financials are pointing you in the right direction, Escalon's FinOps allocates time with a seasoned CFO who has the experience and insight necessary to make smart, informed decisions that will take your business to the next level. Done.

Expenses Done™

Expenses that are unorganized and unattended can throw a wrench in your whole operation. We help you make sure that your bills, expense reports and credit cards are monitored and taken care of in a professional and timely manner. Done.

Revenue Done™

Without a steady inflow, your company can't keep up the good work. We make sure invoicing, inflow and debts owed are paid to you in full. Done.

Accounting Done™

We make sure your books are in balance and error-free by taking care of everything from bank reconciliation and invoicing to cash flow management and year-end reporting. We also seamlessly integrate into your preferred systems. All you have to do is review and approve. Done.

Confident Compliance™

Escalon's experienced accounting and bookkeeping teams have the expertise you need on federal regulations and statutory compliance requirements for complete confidence your records will be current and risk-free. Done.

Sure Setup™

Keeping tabs on your company's advisers and software providers can be onerous. We alleviate this pain before it starts. Our Sure Setup gathers everything into a single place and connects it to our proprietary platform, ensuring your people, our people and all of your systems are in total sync. Done.
