

About BlueCloud

BlueCloud specializes in implementing modern cloud data and analytics solutions by leveraging next-generation technologies and a world class team of IT leaders to transform how enterprises operate and compete in the marketplace. At BlueCloud, we understand the challenges organization face in incorporating data engineering and data science into their operations and we are committed to helping our clients succeed with the modern data analytics stack.

BlueCloud Borderless, Flexible Delivery

Our Borderless Delivery Model empowers us to support our customers with the best resources for the role regardless of geography. By breaking the traditional “Onshore, Offshore, Nearshore” paradigm; our resources ensure premium, yet cost-effective services. Leveraging a Flexible model for resourcing across both geography and delivery methodology; our customers are not forced to tailor their needs to our model; we provide a blended model that best fits their needs with the best resources at the best rates.

Services

 **AI and Machine Learning**
Leverage BlueInsights, our AI-driven accelerator, to empower data analysis and smarter decision making.

 **Cloud**
Monitor, maintain, automate and optimize cloud infrastructure and services

 **Data Engineering**
Facilitate data usage by reliable and efficient data pipelines, ensuring streamlined processes and storage

 **Data Analytics**
Advanced analytics to provide actionable insights through modern cloud-based solutions

 **DevOps**
Increase efficiency in the development process to accelerate releases and time-to-market

 **Software Design and Build**
Accelerate business expansion and competitive edge with secure, scalable and reliable applications

 **Data Governance**
Understand data assets and define ownership and processes to maximize business value

Flexible Delivery
