

Goodbye Checkout.liquid

Why is checkout.liquid being sunset?

Shopify is sunsetting checkout.liquid to improve security, maintainability, and enhance the overall checkout experience for merchants and users. This is a gradual change with the final August 28, 2025 deadline. (As of writing this)

Checkout Extensibility is a new, secure, and upgrade-safe way to customize your checkout process on **Shopify Plus**. It allows for faster app integrations and advanced branding options, replacing the outdated checkout.liquid system.

Checkout

AUGUST 13, 2024

Impact

Shopify Plus merchants are required to upgrade to checkout extensibility by **August 13, 2024**.

The affected pages include information, shipping, and payment.

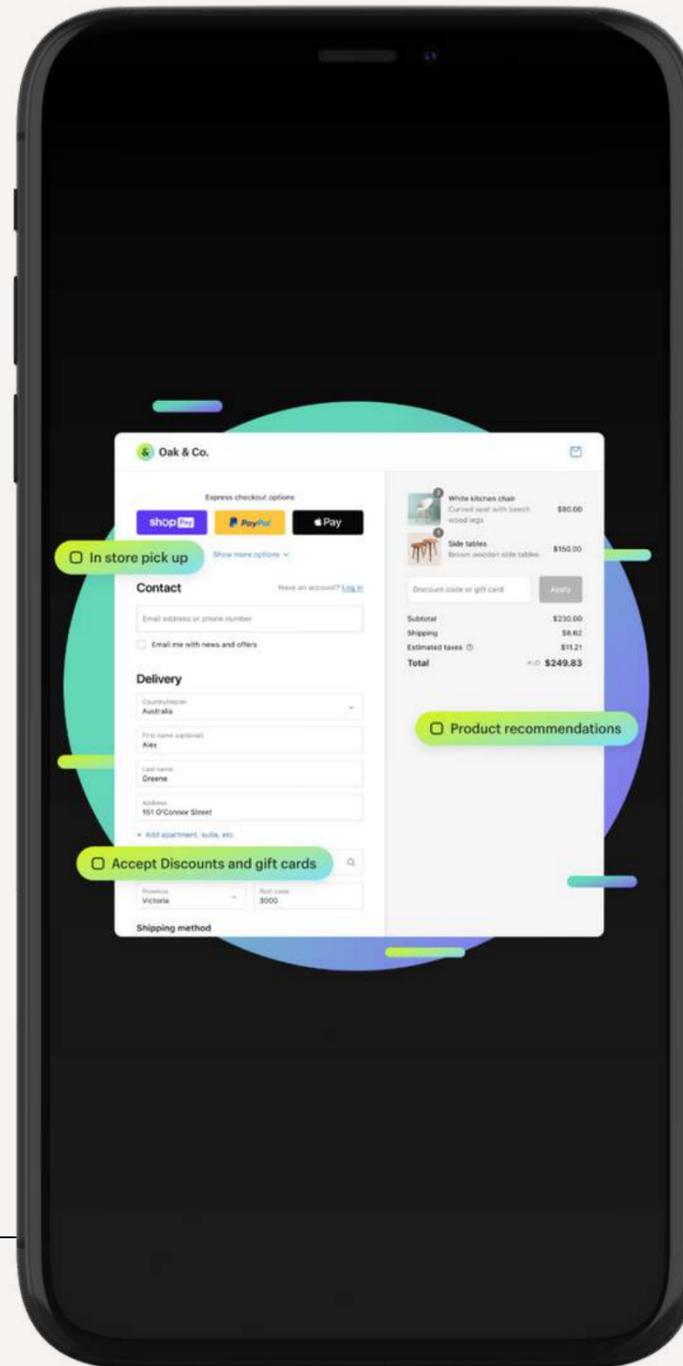

The impact of not upgrading in time can be severe.

Non-plus merchants are **NOT** impacted by this deadline.

● Potential Payout Delays

Since orders will be deemed higher risk, payouts may be delayed by up to 5 days, impacting your cashflow.

AUGUST 13, 2024

● Lack of Support

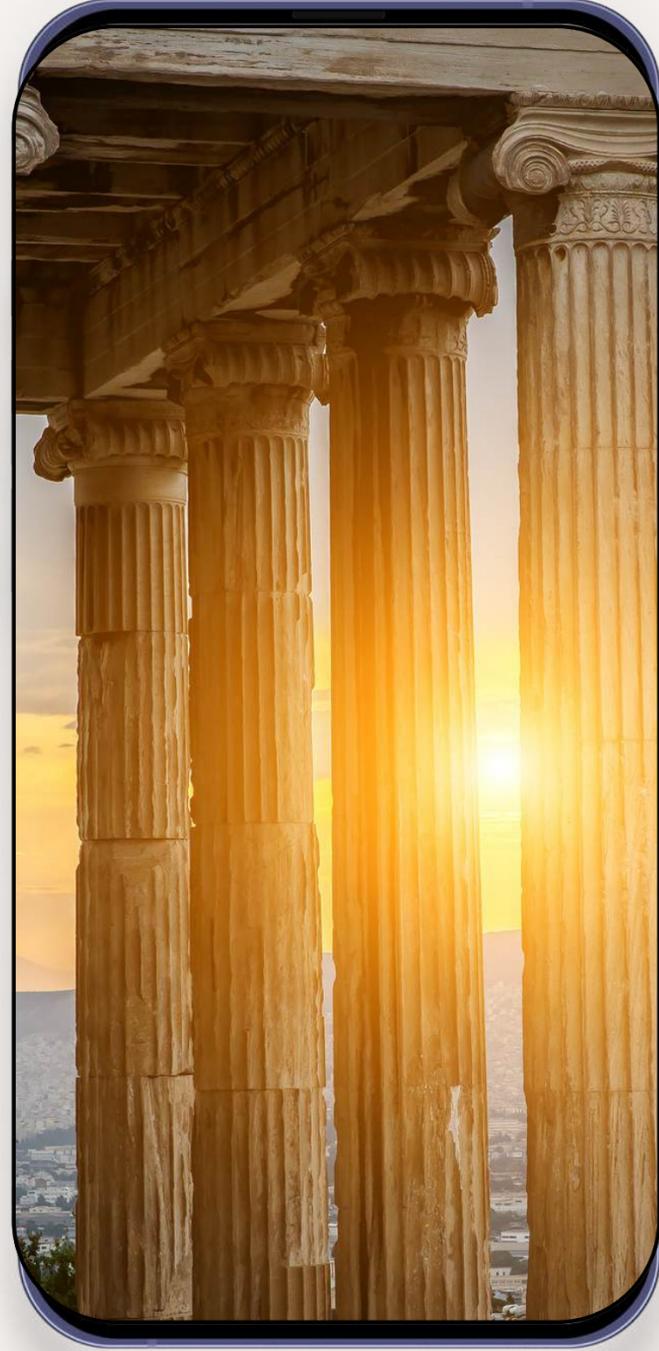

checkout.liquid customisations will be locked & uneditable. Shopify Support will not provide support for updating or fixing.

● Payment Limitations

The ability to deactivate payment gateways or switch providers will be disabled.

● Unreliable Fraud Detection

Accurate fraud and risk assessment becomes unreliable and fraud indicators will no longer be available for new orders.

Thank you & Order Status Pages

AUGUST 28, 2025

Impact

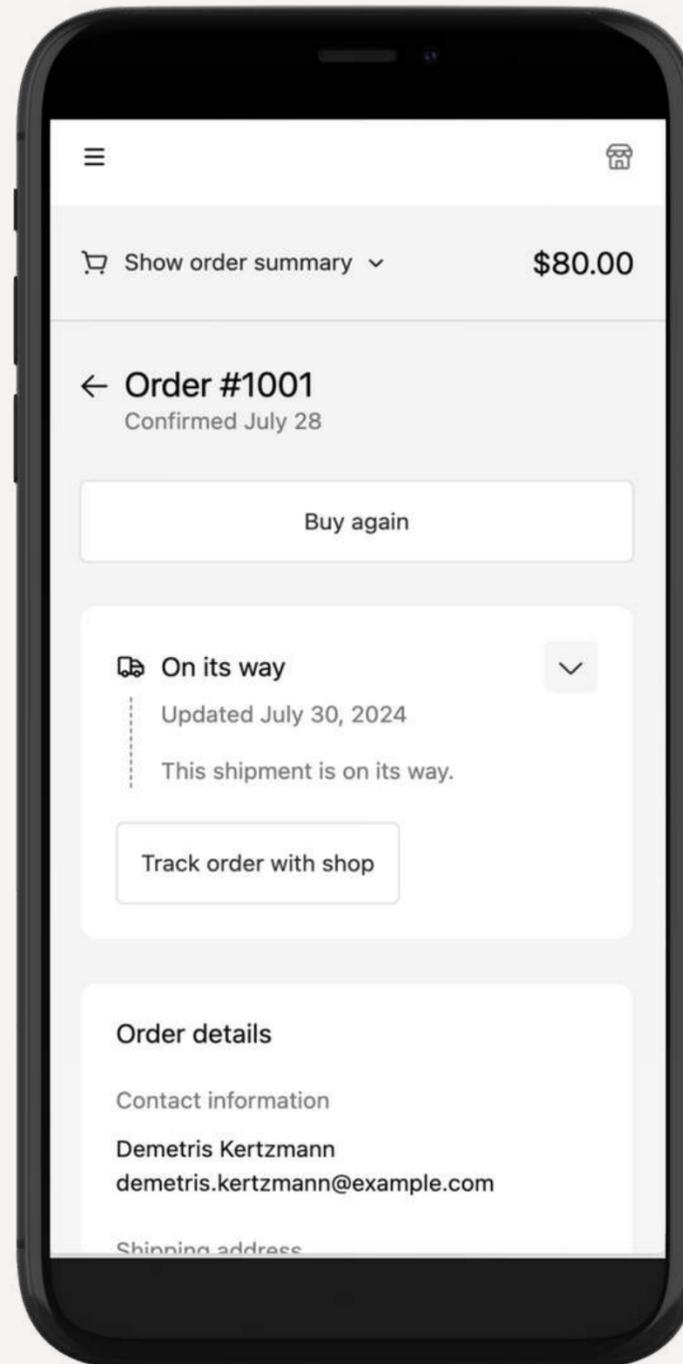

Shopify Plus merchants are required to upgrade their order and thank you pages by **August 28, 2025**.

Including, apps using script tags and additional scripts.

The impact of not upgrading in time can be severe.

Non-plus merchants are **NOT** impacted by this deadline.

AUGUST 28, 2025

● Loss of Customisation

Thank You and Order Status pages will revert to default settings, losing all customisations.

● Shopify Scripts will be Disabled

Merchants will need to transition to using Shopify Functions for customisations previously handled by custom discounting scripts.

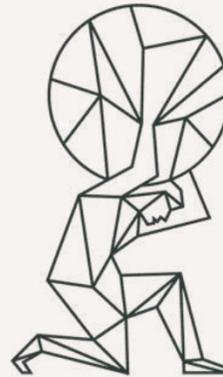

● Tracking Snippets Lose Support

Any tracking snippets/additonal scripts not handled by native apps will lose support, which can result in a loss of conversion tracking. Custom Web Pixels have to be created to mitigate this.
