Two Tier 4 Datacenters in the UK

The infrastructure and scalability of two Tier 4 Data Centres in the UK are critical for ensuring high availability, reliability, and performance. These facilities are designed to meet the highest standards of uptime, with redundant systems and robust security measures in place.

Yorkshire

Residing in the north of England, the Yorkshire data centre provides significant edge connectivity with 1 Megawatt of power.

Milton Keynes

Within the key industrial city in England, Milton Keynes is a world-leading data center with a multi-carrier high-speed network powered by 100% renewable energy.
