

Turn stablecoins into always-on global liquidity for your business

Cross-border money movement is still slow, costly and constrained by cut-offs, resulting in T+1/T+2 delays, liquidity drag and operational inefficiency for EU-regulated firms. With MiCA providing clarity for EURC, institutions now seek compliant, always-on rails.

ClearBank's Digital Asset Rails enable regulated access to minting and redemption of MiCA-compliant EURC and USDC stablecoins via Circle, with instant payouts via SEPA and SEPA Instant. No need for API integration, it provides 24/7 settlement, strong AML and Travel Rule controls.

Key benefits

Unlock 24/7 liquidity, 7 days a week

Move money anytime with stablecoins to reduce prefunding and improve liquidity control.

Accelerate global settlement

Cut T+1/T+2 delays to seconds to speed up cross-border flows and improve treasury efficiency.

Shrink working capital

Release trapped liquidity by replacing cut-offs and buffers with instant fiat payouts.

Reduce operating costs

Lower FX and correspondent fees while streamlining euro- and dollar-payment operations.

Operate with global assurance

Move money worldwide on regulated rails with strong AML and Travel Rule controls.

Core capabilities

Enable stablecoins on demand

Convert EUR/USD to EURC/USDC via ClearBank account infrastructure. No need for API integration.

Leverage instant fiat payouts

Redeem USDC/EURC and pay out instantly via SEPA or SEPA Instant rails.

Deploy digital-asset functionality

Our rails work out of the box for all eligible agency banking clients, including non-digital-native firms.

Automate treasury flows

Enable 24/7 sweeps and liquidity optimisation with digital-asset-powered movement.

Enable digital-rail FX

Use stablecoin as the bridge asset for EUR↔USD on-chain FX and prepare for CPN-powered global corridors.
