crossmint

Offramp

Let your users cash out from stablecoins to local fiat directly to their bank account.

Offramps are Crossmint's stablecoin-to-fiat rails, letting your users withdraw to their own bank account over SEPA, Instant SEPA, ACH, RTP, or wire, with the conversion, compliance, and payout handled end to end.

Offramps handle the complexities of getting money off chain so you don't need to: no banking relationships, no licensing in every market, and no treasury to pre-fund.

Trusted By Global Fintechs & Crypto Firms

MoneyGram · Western Union · VISA · TALA · wirex

Key Capabilities

- **Multiple rails, one API**. SEPA, Instant SEPA, SWIFT, ACH, same-day ACH, RTP, and additional local rails coming soon.
- **Same KYC as the onramp**. Users you have already verified cash out with no re-verification.
- **Headless integration**. Full API control, under your brand.
- **24/7 stablecoin settlement**. The onchain leg clears in seconds; fiat lands at rail speed.
- **No pre-funding**. Convert and pay out on demand rather than holding a fiat float.

Why Crossmint is Unique

One vendor, both directions

The same wallet, contract, and KYC framework as the onramp.

Runs on our licenses

MiCA CASP and PSD2 Payment Institution in the EU, FinCEN MSB in the US.

No banking relationships to build

Multi-rail payouts without opening accounts in each market.

Supported Regions

NORTH AMERICA

US (excluding CA, NY, TX, CO, TN)

EUROPE & INTERNATIONAL

EU Member States, select LATAM, Africa, and APAC regions.
