crossmint

Stablecoin Orchestration

Licensed money movement across the EU, US, and Canada, reaching 160+ markets.

Stablecoin Orchestration is licensed money movement, letting fintechs fund in fiat or stablecoins, hold in treasury wallets they control, convert to different stablecoins or currencies, and pay out across 160+ countries.

Crossmint handles the complexities of cross-border money movement so fintechs don't need to: no correspondent banking, no per-corridor partner integrations, and no pre-funded accounts sitting idle in every market.

Key Capabilities

- **Regulated APIs**. Move money on Crossmint's licenses instead of acquiring your own.
- **Global reach**. Support in 160+ countries.
- **Fiat connectivity**. Move between fiat and stablecoins in both directions.
- **Company-controlled treasury**. Multi-signer approvals, spending limits, and batch disbursement.
- **Compliance built in**. Onboarding, sanctions, AML, and Travel Rule.
- **Dedicated FDEs**. Crossmint engineers embed with your team through launch.

Why Crossmint is Unique

All-in-one
One integration, one API key, one dashboard. Crossmint handles reconciliation and compliance.

Your treasury is a wallet
On/off ramps, stablecoin payouts, custody, and spend are linked under one treasury wallet.

Independent
Not tied to any single bank, PSP, or blockchain. Crossmint aggregates and switches seamlessly.

Forward Deployment Integration Support
Crossmint provides forward deployment engineers who embed with your team to get you live faster. Learn more by contacting your account manager.
