

# An Innovative Idea, A Tangible Product

Empowering Africa's blockchain future through education, innovation, and sustainable development in the Web3 ecosystem.

# Institutional Presentation

IZILAB is an initiative led by IZICHANGE, dedicated to training, applied research, and innovation within the blockchain and Web3 ecosystem.

As an autonomous entity, ZILAB supports the development of blockchain in Africa by building the capabilities of young French-speaking African developers in emerging technologies and their practical applications.

## Mission

IZILAB's mission is to train and strengthen developers' skills in blockchain and Web3 to accelerate the adoption of these technologies in French-speaking Africa.

# Vision

IZILAB aims to accelerate the adoption of blockchain and Web3 in French-speaking Africa by developing skilled and capable talent, driving growth and innovation.

We envision a future where African-led blockchain innovations drive economic prosperity and social transformation, establishing the continent as a leader in Web3 technology while addressing local challenges with global impact.

# Our Core Values

## Inclusion & Diversity

Train all motivated talents, across our area of impact, without any distinction.

## Sustainability

Encouraging blockchain solutions

## Innovation

Fostering cutting-edge solutions that challenge conventions and create new possibilities.

# Values in Action

## Inclusion and Diversity

Our approach values diverse perspectives and strengthens the participation of underrepresented communities in blockchain and web3.

## Sustainability

We provide training in responsible blockchain and Web3, serving the needs of today and tomorrow.

# Our Achievements

IZILAB has established a comprehensive suite of programs driving blockchain adoption and developer capability across francophone Africa.

## ● **TechForge Program**

Empowering Web2 and Web3 developers with advanced skills for career growth.

## ● **Web3 Careers Discovery Day**

Immersive events with talks and hands-on blockchain experience.

## ● **Online Meetups**

Regular virtual meetups showcasing blockchain benefits to Francophone African youth, fostering community and learning.

## ● **BlockDev**

Fully online blockchain developer training with flexible, accessible learning paths.

## ● **Sector Awareness**

Educating stakeholders on blockchain's real-world impact in healthcare, finance, agriculture, and governance.

# TechForge Program Archives

Documenting our journey of empowering the next generation of blockchain developers through intensive, hands-on training experiences.

# TechForge Program Archives

Capturing moments of learning, collaboration, and breakthrough as participants master blockchain development fundamentals and advanced concepts.

# TechForge Program Archives

Building a community of skilled blockchain developers who will shape Africa's technological future and drive innovation across the continent.
