

LET'S GROW TOGETHER

Who We Are

We Are Business Owners Too

We understand your journey and are entrepreneurs at heart. We're here to reduce the burden of being a business owner, putting ourselves in your shoes as we provide our services.

Bringing the Best of Corporate

Our team has the big, corporate experience providing best practices and processes in a way that is relevant to small business owners.

The Archaic Problem

❑ For business owners, a CFO is too expensive, a quality bookkeeper is rare, and a tax professional shows up once a year.

❑ Historically, accounting firms have focused on compliance services rather than business services.

Tenth Solution

We created the ability for business owners to make educated decisions through access to a bookkeeper, a tax professional, and a CFO at an affordable price point.

What Makes Us Different

Work With Real People. You get a dedicated account team with real humans. That's right. **We are not a software company.** We believe in building long-lasting relationships with our members to help them grow.

Industry Proven Technology. We **actively research** new technology and automations focusing on team time and efficiency, and client best practices and value. Our team is accustomed to reviewing the technology, implementing, and providing standardized solutions while maintaining the custom feel of service.
