AI Workflow agents for a major telecom company

Challenge

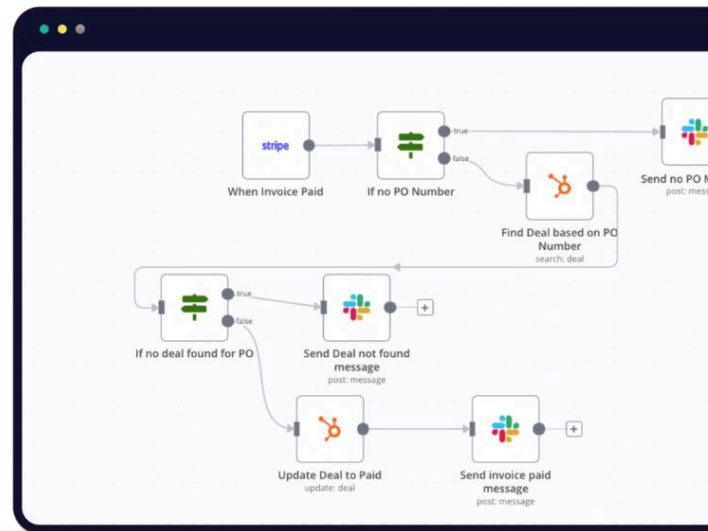

A national telecom provider needed to accelerate engineering workflows and reduce manual ticket triage across multiple teams.

Solution

Bitovi implemented a multi-agent system using n8n, Slack, and custom LLM workflows. Agents retrieved ticket context, enriched descriptions, surfaced relevant data from internal Confluence and Google Drive, and auto-populated acceptance criteria.

Results

- 70%+ reduction in time spent per ticket
- Swift-to-value pilot in <30 days
- Scalable framework for expanding AI across departments

“ I’ve never had a partner that has gone that extra mile to embrace the brand, and I was just floored when Bitovi did that.”

We love to collaborate—let’s talk.
