

Unlock the Full Power of Skills Intelligence.

Most platforms automate decisions you can't explain. Opptly shows exactly how skills are extracted, inferred, and aligned—so you can act with confidence.

AI-Powered Hiring & Workforce Planning

A suite of skills-based products capitalizing on the Opptly foundational AI model. Used as a strategic entry point enabling skills-based hiring, the suite includes the Job Analyzer, Job Taxonomy Analyzer, Job Description Generator, and Workforce Skills Inventory.

- **Enhanced Job Descriptions:** Generates precise and market-relevant job descriptions using AI insights.
- **Optimized Job Taxonomy:** Streamlines job classifications to align with industry standards and demands.
- **Market Relevant Titles:** Creates job titles that reflect current market trends and industry needs.
- **Dynamic Skills Inventory:** Adapts and updates skills classifications to match evolving job market requirements.

Skills Intelligence Core Product Suite

Job Analyzer

Leveraging Opptly's proprietary AI model, upload a job description and allow the AI algorithm to interpret and display the skills necessary to be successful in that role and map to an industry standard job title.

Job Description Generator

Leveraging Opptly's proprietary AI model, upload a job description and allow the AI algorithm to interpret and display the skills necessary to be successful in that role and map to an industry standard job title.

Job Taxonomy Analyzer

Leveraging Opptly's proprietary AI model, bulk upload a full job taxonomy of titles and job descriptions. Allow the AI algorithm to interpret and provide an enhanced taxonomy, including the skills necessary to be successful in that role and a mapping to an industry standard job title.

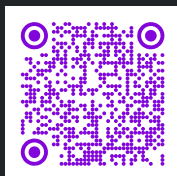

Workforce Skills Inventory

Opptly's AI analyzes workforce data to quickly and consistently understand an organizational skills makeup. This method of skills-oriented talent management allows for data-driven decisions to be made in support of talent acquisition, succession planning, and internal mobility
