

One login, separate money

Aventide is a CRM for multiple businesses: one login holds every business you run, and each one keeps its own clients, branding, client portal and Stripe account, so its money goes to that business. Both plans include every feature, unlimited businesses and unlimited team members, from \$39 a month.

How it works

One Aventide login holds every business you run. Each business keeps its own clients, branding, client portal and Stripe account, so a client's payment goes to the business they hired. Switch businesses from one menu.

A client sees the business they hired: its name, logo, colors and fonts on its portal, documents and booking page.

The business menu, with Lumen & Oak Studio checked and Fern & Field Consulting below it.

What each business keeps to itself

Clients and their work

Each business has its own clients, proposals, contracts, invoices and documents. If the same person is a client of two businesses, each business keeps its own record of them.

Payments

Each business connects its own Stripe account and, if you use it, its own QuickBooks company, so a client's payment lands with the business they hired and its books stay its own. Aventide adds no fee of its own on top of Stripe's.

Social accounts and connections

Social accounts, Zoom, and Google Search Console and Analytics connect to one business, so posts and reports stay with the right brand.

Brand and client portal

Each business has its own Brand Kit: logo, colors and fonts. Its client portals, documents and booking page use that kit, so every client sees the brand they hired.

Booking pages

Each business has its own booking pages and booking address, and can take payment in full or a deposit when a client books.

What Aventide's AI knows

Aventide's AI reads the saved details of the business you're in, so a proposal for one business uses that business's prices and voice.

Anything Aventide drafts for a client waits for your approval; automations you switch on run on their own.

What you share across businesses

Your login, your plan, your team and your AI credits are shared by every business on your account. You set them up once.

One login, one plan

One subscription covers every business on your account: Starter at \$39 a month or Pro at \$99. Both plans have every feature and unlimited businesses; they differ only in AI credits and storage.

One team

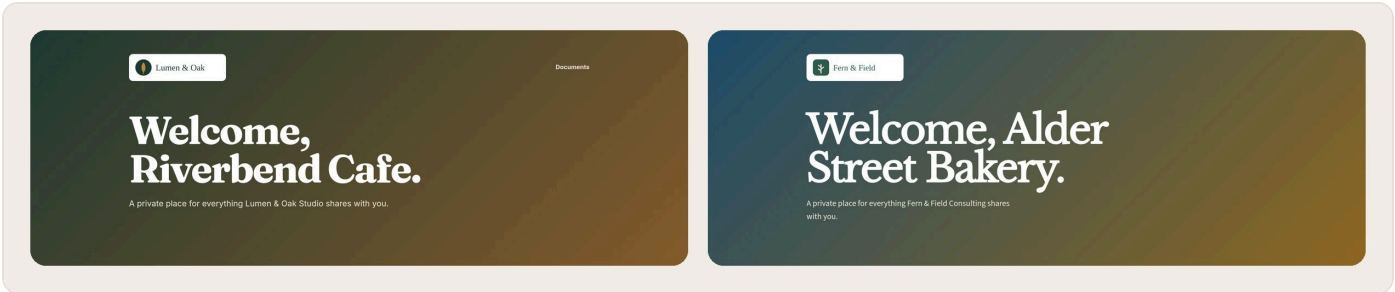

Everyone on your account can open every business on it, and team members are unlimited on both plans. Each person connects their own Gmail and Google Calendar, and nobody reads anyone else’s mail or calendar.

Switch from one menu

Pick a business from the menu at the top of the Business Hub. Every screen reloads for the business you picked. In Telegram, WhatsApp or Slack, ask Sidekick to switch; that changes that chat only.

One AI allowance

AI credits are one monthly allowance for the whole account, used by every business: 40,000 on Starter, 120,000 on Pro.

Two businesses, two client portals, one login: Lumen & Oak Studio welcoming Riverbend Cafe, and Fern & Field Consulting welcoming Alder Street Bakery, each in its own logo, colors and fonts.

Prices in US dollars, checked October 14, 2026. Screenshots are from the demo businesses.

Every business. One login.

14 days free · No card · Up to 3 businesses in the trial
