

# Keep Customers Transacting

Improve retention rates and drive more conversions. Route, tokenize, and optimize each transaction with Basis Theory as a foundational component of your payment infrastructure.

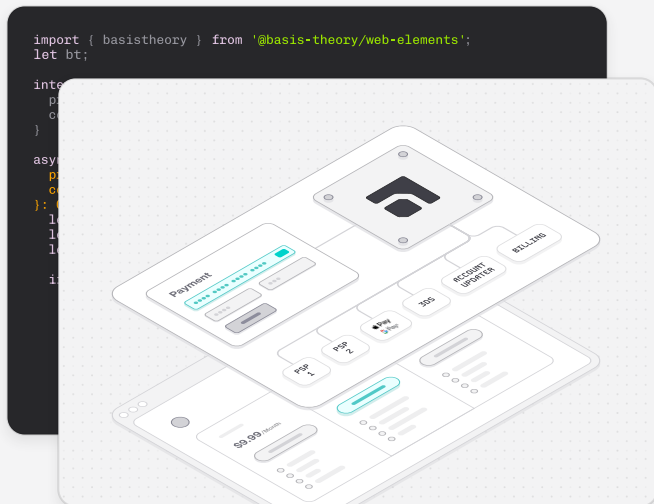

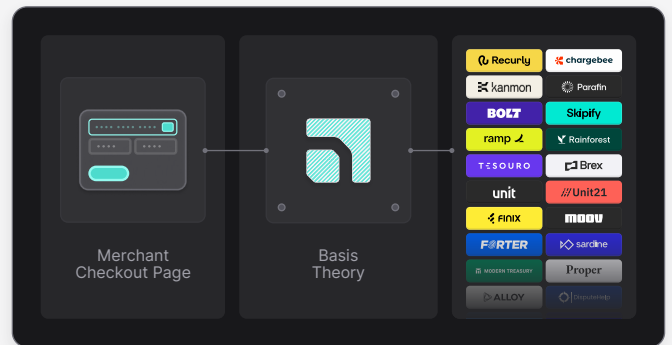

Innovative Merchants  
Work With Basis Theory

## Never Miss a Payment

What can an independent payment vault do for your payment stack?

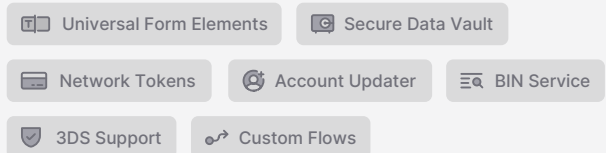

- ✔ Accept payments directly.
- ✔ Support any payment method.
- ✔ Reduce the risk of a PSP shutdown or outage.
- ✔ Demonstrate PCI compliance on your behalf.

## Built for Developers, Loved by Security Teams

Retain full ownership and utility of your data.

- ✔ Migrate payment data from current processors.
- ✔ Consolidate front-end components.
- ✔ Support any processor, gateway, fraud solution, or partner.
- ✔ Card enrichments sit native in the vault.
