

Split card payments, instantly

SplitSum lets service businesses accept card payments and automatically pay independent contractors their share, without manual bank transfers or spreadsheets. Built on Stripe Connect.

Who it's for

Service based businesses that pay independent contractors a cut of every job: tattoo shops, salons, barbershops, beauty clinics, cleaning companies, personal training studios, mobile mechanics, and similar setups where a customer pays the business and a contractor is owed a share of that payment.

How it works

1

SET THE SPLIT

Choose how much each contractor is owed your business and it will apply automatically.

2

ACCEPT PAYMENT

Take card payments in person with Tap to Pay or a card reader, or send a payment link for off site payments.

3

GET PAID OUT

Stripe Connect sends each party their share directly. No manual transfers and no holding contractor funds.

Key Features

NO CODE SETUP

Business owners configure splits themselves. No developer or integration work needed.

AUTOMATIC CONTRACTOR PAYOUTS

Contractors receive their share directly through Stripe Connect as soon as the customer taps.

POINT OF SALE READY

Works as a standalone terminal solution for taking payments on the spot.

MULTIPLE WAYS TO ACCEPT PAYMENT

Tap to Pay, Stripe card readers, and payment links cover in person and off site jobs.

OWNER LEVEL CONTROL

The business owner sets split rules and manages contractor accounts and permissions.

FEE AND PAYOUT TRACKING

See collected fees and payout totals per contractor and per period.

Built on Stripe. SplitSum runs on Stripe Connect Accounts, so contractor payouts move through Stripe's payment infrastructure rather than the business holding and forwarding funds itself.
