

SiteCloud SEARCH

Powered by AI

SiteCloud Search enables you to more efficiently manage projects from any location.

In the complex world of construction, what remains constant is the importance of delivering projects on time and on budget. SiteCloud Search powered by AI can help you do just that.

With a few simple clicks you are able to search the vast amount of images captured by your Sensera system to understand what is happening on your site in real-time.

Save time and valuable resources from having to travel into the field to do safety inspections.

Drive efficiency in your operations by being able to check the location of equipment throughout the day.

Improve safety by monitoring the vehicles that enter and exit your site.

The Sensera **SOLUTION**

1. Ability to search all cloud based images captured by the Sensera cameras installed on the site.
2. Sensera's AI model searches the images that match the requested criteria and delivers them to you in SiteCloud sorted by date and time.
3. You can easily save the labeled searches for easier access in the future.
