

Daily Construction Reports

Strengthen and streamline your field reporting with Rhumbix **Daily Construction Reports**

Rhumbix includes an easy-to-use mobile app that allows your foremen to quickly capture and share daily construction reports direct from the field

- Easily record the key information needed to complete Daily Construction Reports (DCR) from the same app your foremen use for timekeeping.
- Essential project details such as labor, equipment and material usage can be enriched with attachments, photos, and automated weather reporting based on your project locations.
- Our mobile app is designed for the field, ensuring quick and easy report creation through features like voice-to-text entry and configurable data sharing between workflows, reducing the need for duplicate data entry.
- Automatically generate and share professional reports with others in the field or office as well as general contractors or owners, including the ability to email reports from the app, and request approvals from third parties.

PRODUCT FEATURES

Create daily construction reports in minutes from the field

Attach photos and documents for documentation backup

Auto-generate PDF reports for faster submission & sharing

Find and search all your DCRs in a centralized cloud dashboards

Ensure a digital audit trail of document changes & approvals

Integrate completed DCR data with other systems (ERP, PM etc.)

BENEFITS

Consolidate your foremen's field reporting from separate software tools into one integrated mobile platform

Allows managers to easily find, share, and review daily construction reports over the life of the project

Rhumbix configurable forms allows your custom reporting requirements to be included to mimic existing workflows.

Share completed DCRs with GCs via email, and integrate completed documents to PM tools for document retention.
