

Sync Autodesk Build with CMiC

Save time, reduce errors, and improve decision-making

Keep your financial data up-to-date between the office and the field with Agave Sync. Your project team can fully leverage Autodesk Build's best-in-class project and cost management tools without interrupting your finance team's CMiC workflow. Both parties can leverage the latest information to make better decisions and keep the project budget on track for maximum profitability.

"Agave captured our requirements and built an integration we rely on. As project complexity increases, we needed an integration to ensure Autodesk and CMiC were providing accurate data to our project teams. Agave's integration does exactly that."

– Tim Kelleher, Operational Standards and Innovation Manager at Brinkman Construction
