

Near Term and Long Term Cybersecurity Solutions

The goal is to remove the obstacles you are faced with as entrepreneurs and disruptors so that you can focus on your core mission and objectives.

Who I Am

I am a father, an entrepreneur, and a trusted cybersecurity partner to SaaS and technology-enabled businesses from Halifax, Nova Scotia, to Mission Viejo, California.

I work with entrepreneurs as an advisor, cybersecurity compliance project manager, security strategist, and security analyst all wrapped up in one to assess gaps in startups and SMBs between where they are and where they need to be to best serve and remove obstacles hindering their go-to-market strategies & activities.

Why work with me?

Entrepreneurial Expertise

I have worked with startups as an advisor for over 5 years. I have an MBA with a specialization in Entrepreneurial Management from AIB. Some folks I have helped came from incubators such as Y-Combinator and Techstars cohorts.

Consulting Expertise

I have been consulting in cybersecurity for the better part of 10 years. Clients I have worked with include fintech, healthcare app and telehealth app developers, non-profits, various SaaS startups, and SMBs such as marketing agencies.

Rapid Value Creation

I am committed to removing the obstacles slowing down your go to market and monetization efforts, large and small. I can help you turn cybersecurity into a competitive advantage. One that also earns the trust of your prospects, customers, partners, and key stakeholders.
