

# Pay a bill. Get the big picture.

Digits is AI-native accounting software that runs your bookkeeping and reporting for you. With seamless BILL integration, every payment updates your books in real-time — so you always know the health of your business.

Experience big picture accounting

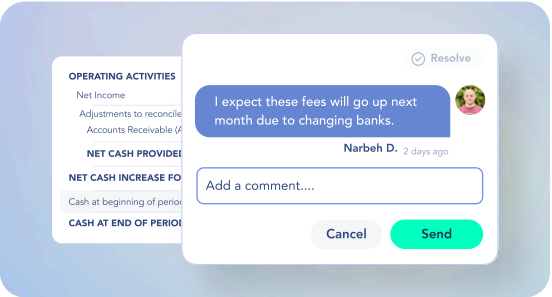

### Autonomous General Ledger®

Digits ensures unmatched data fidelity by categorizing transactions, attaching vendor details, and collecting context—intelligently.

### Real-time financials

Unlike static spreadsheets or delayed reports, Digits delivers out-of-the-box AP/AR reports and dynamic financials you can slice and dice.

### Effortless alignment

Comment on any transaction to turn Digits into a shared workspace where leaders align and accountants resolve faster.

## Features

### ✓ BILL Read-only sync

Payables	Receivables
Customer	Vendor
Payments	

### ✓ Migrate in minutes

You can transfer your accounting data over to Digits in just a few steps with our importer or API Connector. Bring your data into accounting software that understands your business.

### ✓ Bank-grade security

With Digits' SOC 2 Type II compliance, you can rest easy knowing your data is protected by the industry's most rigorous standards for security, availability, and integrity.

Accounting software—that works for you.  
For BILL customers only, get **50% OFF** for the first 3 months!
