Our methodology

Who are we?

Quivvy Solutions is a reliable technology partner, specializing in Airtable and various no-code/low-code platforms, including Make and FlutterFlow.

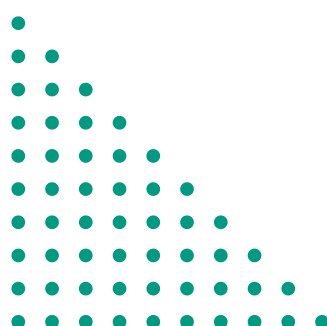

Mission:

Our mission is to streamline business complexity through customized Airtable solutions, expedite digital transformation by establishing Airtable as the central hub for workflows and collaboration, and empower teams to operate efficiently, innovate swiftly, and embrace solutions they find enjoyable.

Vision:

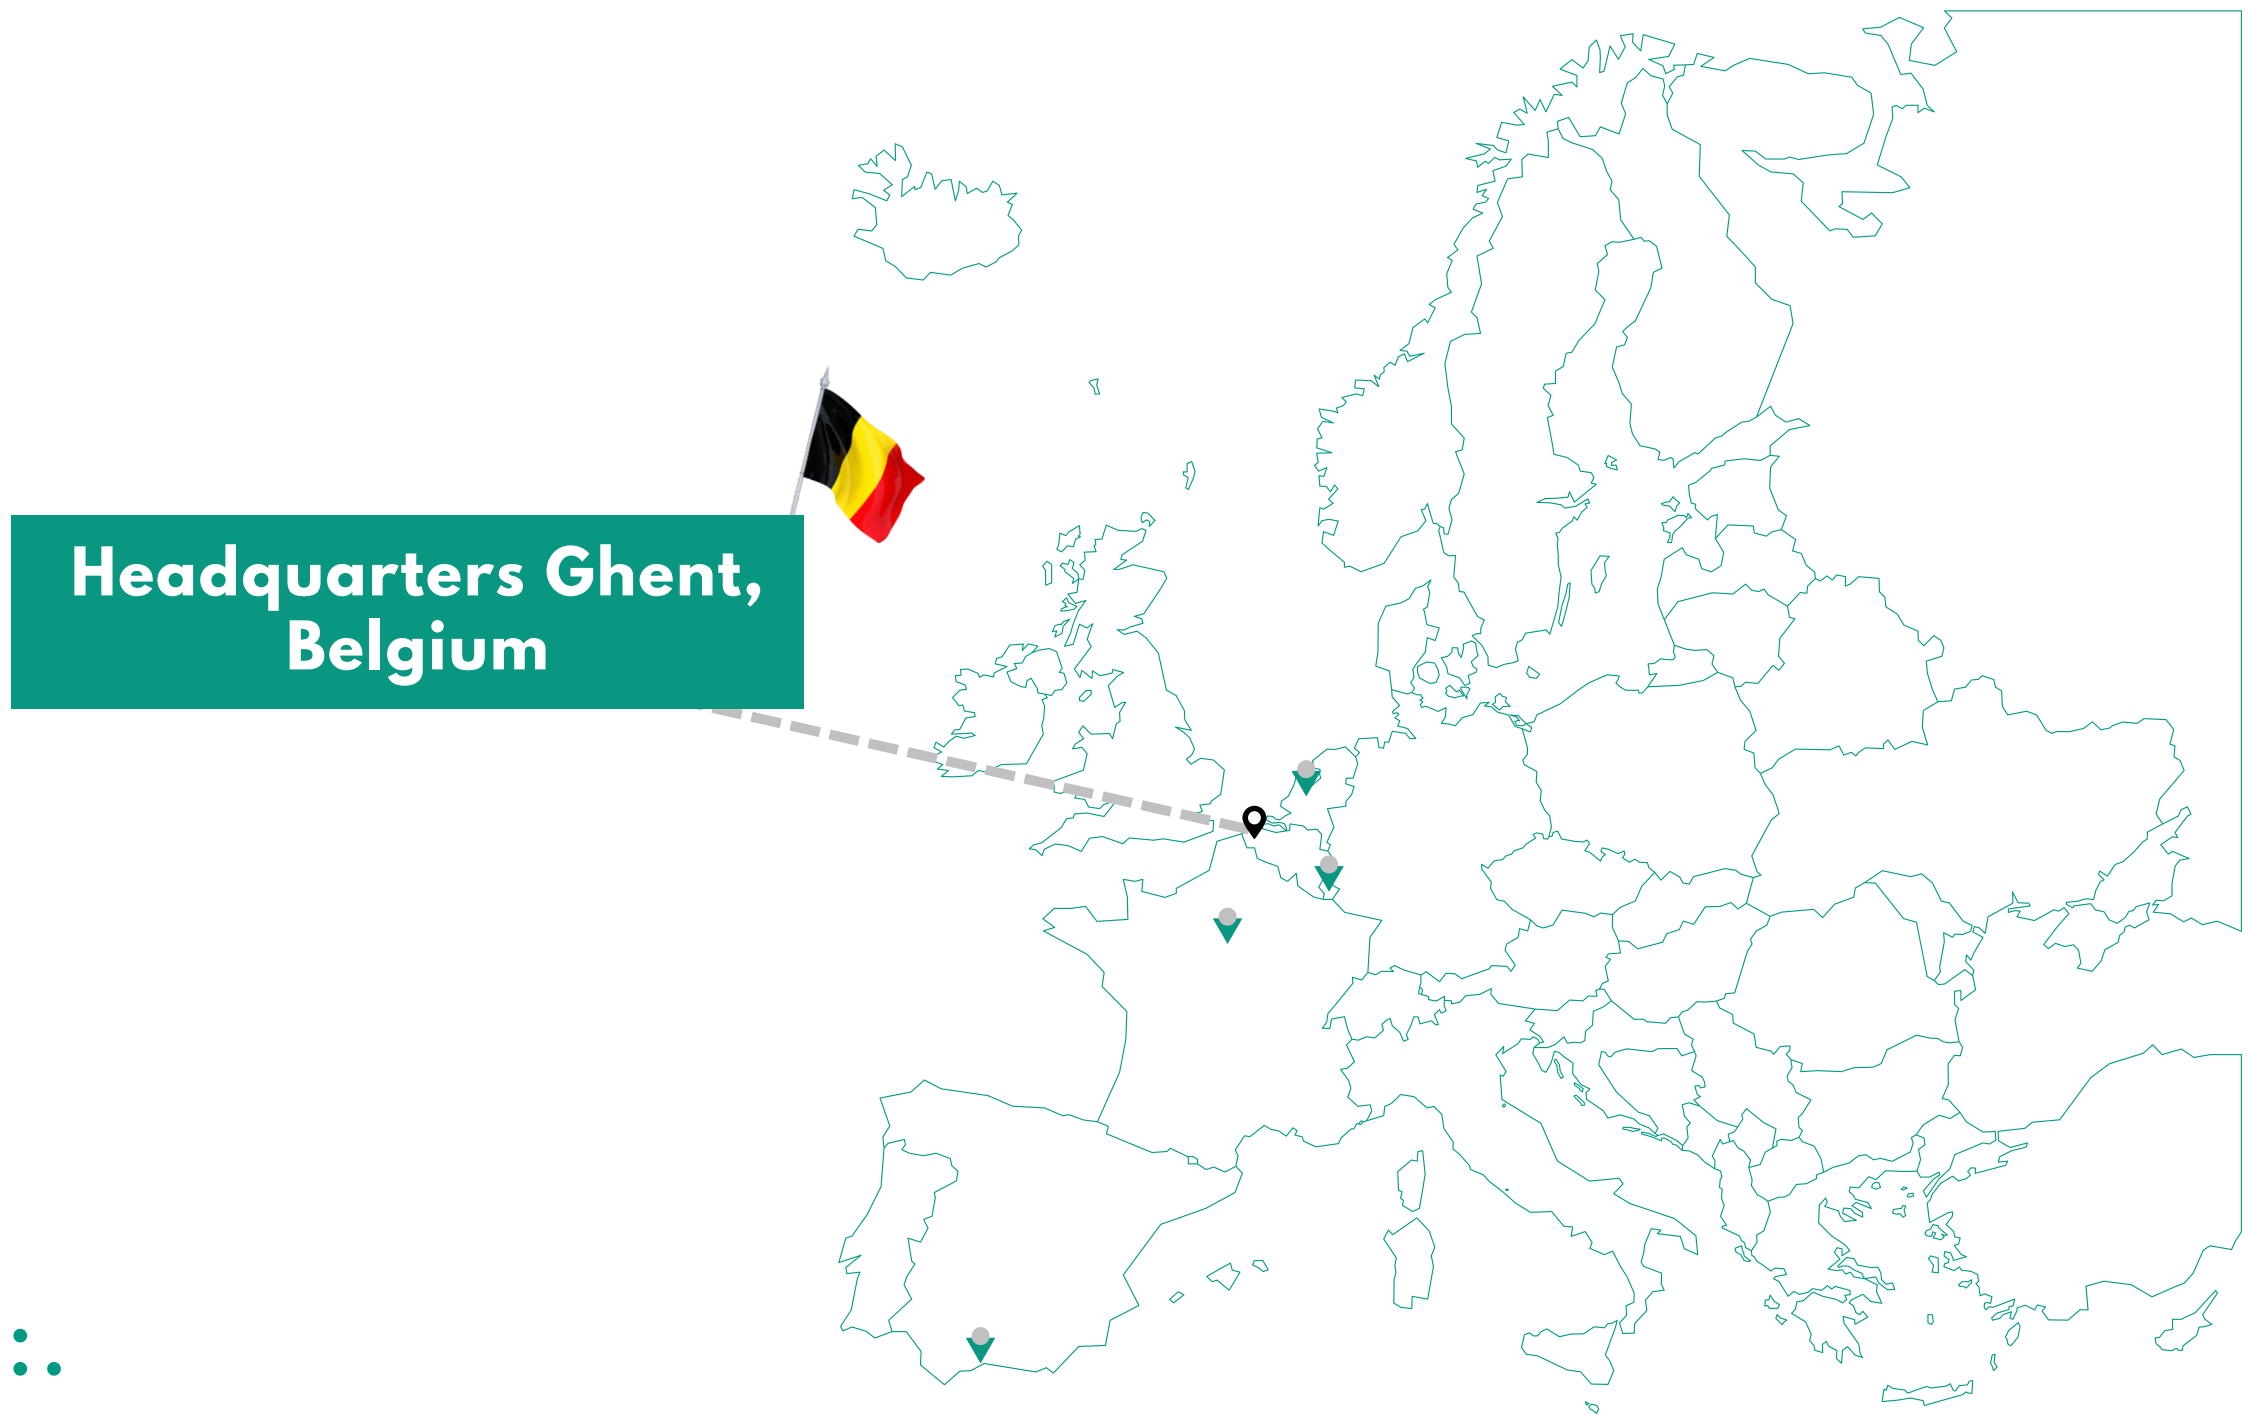

Our vision is to establish ourselves as the front partner in the modernization and optimization of business processes through tailored solutions utilizing Airtable, empowering teams to collaborate effortlessly, expand their operations, and realize their full potential.

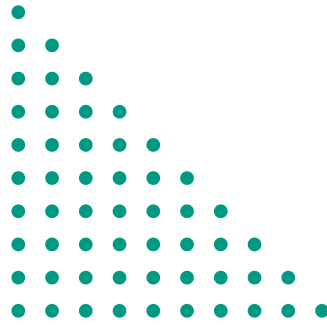

Our European offices

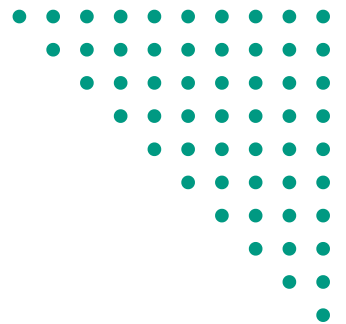

Quivvy Solutions' headquarters is situated in Ghent, Belgium. Additionally, we maintain satellite offices in various other countries:

Satellite offices

- **France**
14 Rue de Dunkerque
75010 Paris
- **The Netherlands**
Rhijnspoorplein 10-38
1018 Amsterdam
- **Luxembourg**
Boulevard Royal 26
2449 Luxembourg
- **Spain**
Ricardo Soriano Avenue 72
29601 Marbella

Our team.

We currently employ 10 individuals and are experiencing rapid growth to enhance our support for clients more effectively.

Developer

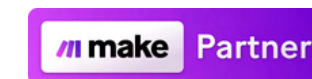

Our proposal

► Custom software

We develop bespoke software tailored to the specific requirements of each client, utilizing Airtable as our primary platform. Our focus is on crafting intuitive, scalable, and high-performance solutions.

► Software integration

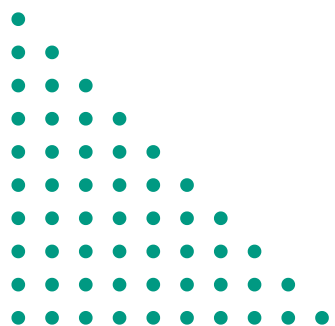

We integrate and automate our clients' tools utilizing Airtable and Make. This enhances workflows, minimizes errors, and efficiently connects various systems.

► Mobile applications

We also create mobile applications using FlutterFlow, with Airtable serving as the back-end, to facilitate business processes on smartphones and tablets.

Low-code development

Low-code development enables the rapid and cost-effective design of applications through the use of visual development tools and reusable components.

This approach enables us to implement projects with minimal manual coding, decrease errors, and respond more swiftly to market fluctuations, all while substantially lowering development costs.

This represents the future of software development: swifter, more adaptable, and more efficient than ever before.

Accelerated delivery

Thanks to reusable components and "drag-and-drop" tools, we can develop applications up to ten times more rapidly.

Profitability

Reduced manual coding results in decreased development costs and enhanced project efficiency.

PeppoBox

 www.peppobox.com

PeppoBox by Quivvy Solutions directly links your invoicing system to the PEPPOL network, enabling fully automated, secure, and compliant electronic invoicing. There is no need to replace your existing tools, as it integrates effortlessly with your current workflows.

Key attributes:

Automated invoice management

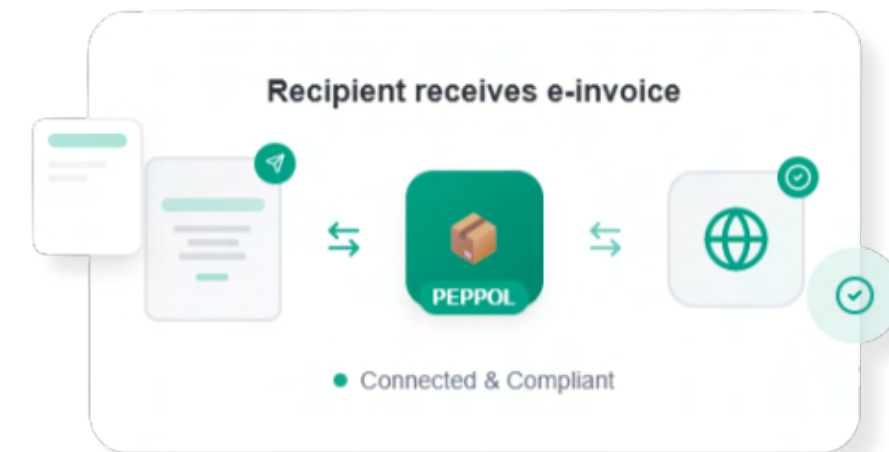

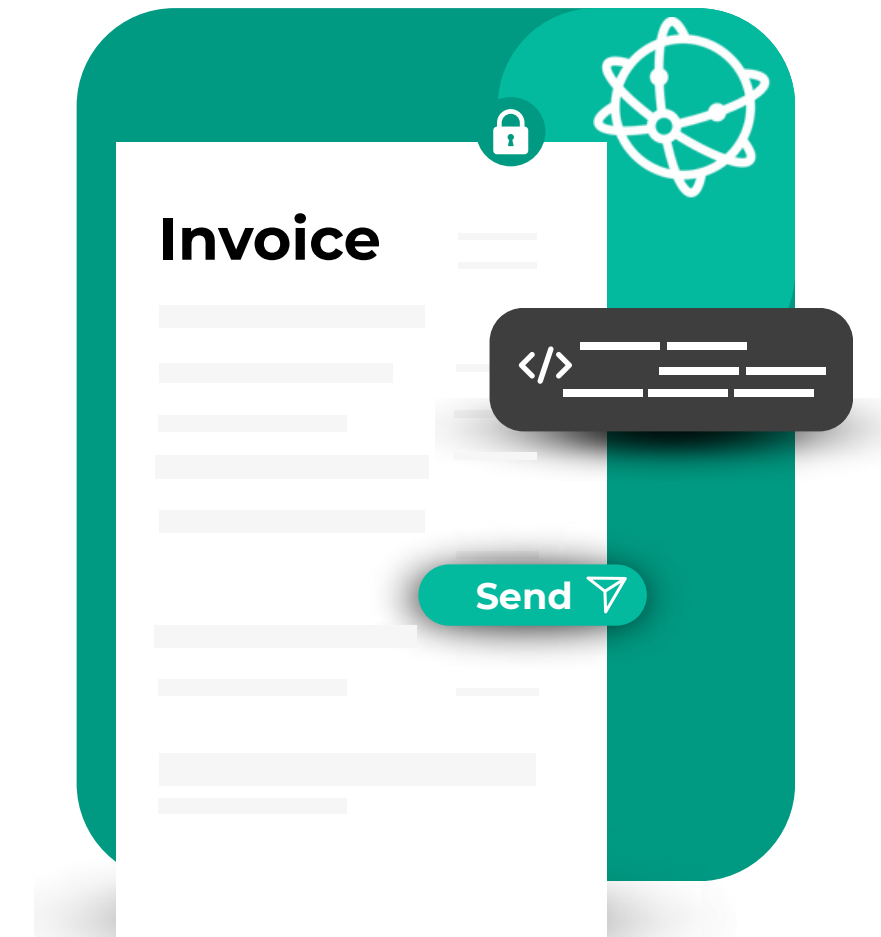

Plug-and-play integration (exceeding 2,500 systems)

- Adhering to PEPPOL and EU standards
- Secure and real-time data administration

Flexible: low-code connectors or complete control through API

Why choose PeppoBox?

Enhance your invoicing processes, minimize manual labor, expedite your payments, and position your business for the future in light of the 2026 e-invoicing mandate.

complex Solutions, easy Experiences

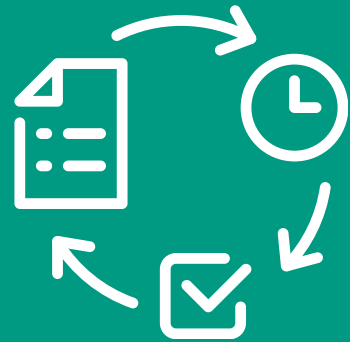

Organization and support

Project administration

Each mission is conducted in a systematic manner, adhering to a stringent organizational framework.

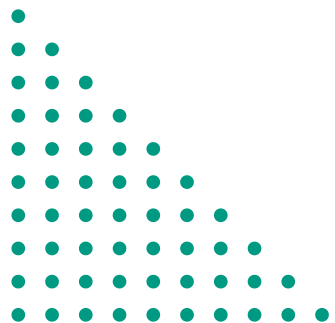

Dedicated Service Level Agreement

Unambiguous commitments to ensure quality and compliance with delivery deadlines.

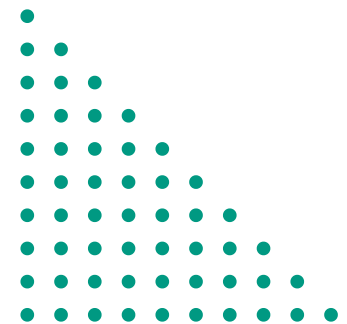

Premium Support

Responsive and effective assistance at every phase of your project.

Organization and support

Our methodology

At Quivvy Solutions, we operate within a project-based framework, assigning a dedicated team to each client.

For every project

Axel – Project Manager

Tomas – Software Architect

Stijn and Jarne – Software

Developers

Axel G

Project Coordinator

Tomas Bracke

Software Architect

Stijn Baele

Software and Mobile Developer

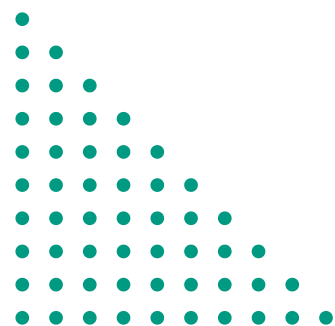

Jarne Spitaels

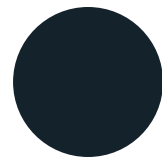

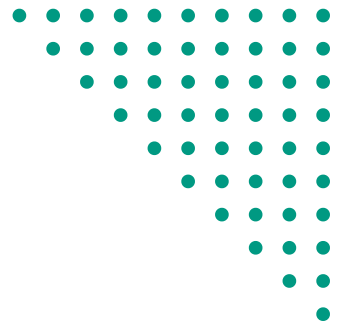

Software and Mobile Developer

Documentation and training

For every project, we supply the requisite documentation and arrange tailored training sessions to guarantee the optimal utilization of the implemented solutions.

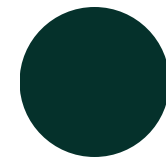

Our methodology

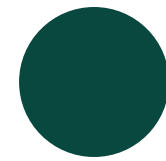

Phase One Discovery

We collaborate closely with you to comprehend your distinct needs and objectives.

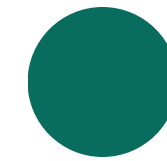

Phase 2 Planning

Our team is formulating a detailed implementation strategy to facilitate a seamless transition.

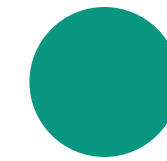

Phase 3 Development

Our specialists oversee the comprehensive deployment, guaranteeing a seamless implementation with minimal disruption to your daily operations.

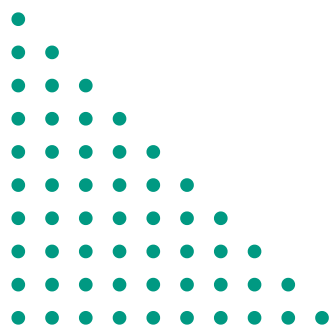

Phase 4 Deployment

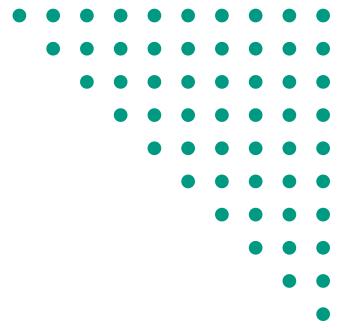

Our committed team manages the entire implementation process, ensuring minimal disruption to your daily operations.

Phase 5 Support

Our committed support service is accessible around the clock to address your inquiries and resolve any concerns you may encounter.
