

AI For Cost Reduction

Capabilities And Case Studies

At ValueStack, we understand how to leverage AI to automate and transform the cost base of companies to materially improve operating margins.

What We Do

We analyse your cost base and work with your teams to remove cost at source, reduce manual effort, and improve margin resilience. Common use cases include:

- HR Automation & Transformation
- Vendor & SaaS Cost Rationalisation
- Back-Office Workflow Automation
- Finance & Reconciliation Automation
- Marketing & Agency Cost Elimination
- Cognitive Task Automation

Case Studies

+34%

Reduction in
technology spend

Enterprise IT Services

Identified high-cost software licences across the tech stack and rebuilt core workflows using AI-enabled tools, eliminating subscription dependency and delivering a lower-cost solution.

+72%

Reduction in analyst
headcount costs

Financial Services

Identified high-cost analyst dependency and built an AI-enabled research capability to automate data gathering, and insight generation, materially reducing headcount and increasing speed.
