

Smart Bar USA[®]

Automated Cocktail Dispensing System

THE FUTURE OF BEVERAGE SERVICE

Cabinet Mounted Smartender
50 Series Connected to Central
Pump Room

The Perfect Cocktail Every Time!

Smartender® is the industry leading automated cocktail dispensing system, delivering speed, accuracy and reduced operating costs to any beverage program.

Example Client List

Software

Our patented software allows for maximum flexibility with a user management function that's equipped with do-it-yourself instructions for easily creating cocktail recipes, adjusting pour and glass sizes, and establishing multi-level security features to prevent unauthorized changes. The lead/support feature permits multi-unit changes through one machine (lead) and transfer to all other machines on the network.

Technology

Smartender provides seamless operation and multi-unit management — interfacing with most POS systems.

Modern Ordering

Smartender is compatible with consumer-based ordering systems.

Ordering is easy using the latest QR code integration and solutions.

Smartender® 50, 34 18 & 8

“ THE FUTURE OF DRINK
AUTOMATION IS HERE! ”

The ultra-slim, Smartender delivers power and precision in a sleek and stylish form making it a welcomed addition to any front or back-of-house installation.

With four models to choose from (8, 18, 34 and 50 liquid ingredients and up to 12 Bag in Box Mixers), the Smartender provides fast, consistent and perfectly poured cocktails at the touch of a button.

 **8** 8 base liquids + 6 bag-in-box mixers

 **18** 18 base liquids + 12 bag-in-box mixers

 **34** 34 base liquids + 12 bag-in-box mixers

 **50** 50 base liquids + 12 bag-in-box mixers

MAKING COST REDUCTION EASY!

- Average 6% improvement to liquor costs.
- Eliminates theft.
- Reduces shrinkage.
- Pours exact recipes to 1/16th oz.
- Creates Labor Flexibility.
- No bartending experience needed.
- 30% increase in team efficiency.

Key Features

- Patented pouring nozzle provides quality product taste for all ingredients.
- Advanced drink modifier recognition to interface with the most unique POS setups.
- Custom cocktail feature allows for any called cocktail to quickly be built and dispensed to the guest's request.
- Remote machine management and reports via Web Manager portal, while machines are online.
- Simple operation with customizable prompts throughout the pouring process.
- Simultaneous pouring of liquors and mixer result in an average pour time of 4 seconds per drink.
- Accurate liquor pours to within 1/16th of an ounce.
- Customizable alcohol service schedule allows or denies access by date and time.
- Compatible with consumer-based ordering and payment processing technology.

Liquor Supply & Delivery

The Smartender integrates with any existing pump room, liquor or wine supply system. It can also be used with the Smartender LS300 Liquor Delivery Trough or the Smartender LS800 Liquor Delivery Rail (LDR). Smart Bar USA can build custom pump rooms either rack or wall mounted using our 3-bottle trough or our liquor delivery rails.

LS300 Liquor Delivery Trough

Designed for medium and high-volume applications, the LS300 allows the delivery of three bottles sequentially to the Smartender unit before refill.

LS800 Liquor Delivery Rail (LDR)

Designed to be installed in the most confined spaces. Dispenses eight liquors, one bottle per liquor brand and includes bottle empty function.

Back-of-House Pump Rooms & Local Delivery Systems

Smart Bar USA can build custom pump rooms, either rack or wall mounted, using our 3-bottle well trough systems or install our liquor delivery rails.

LS300 Rack Mounted Local Liquor Delivery System.

LS300 Wall Mounted Central Pump Room

LS800 Under Cabinet Mounted

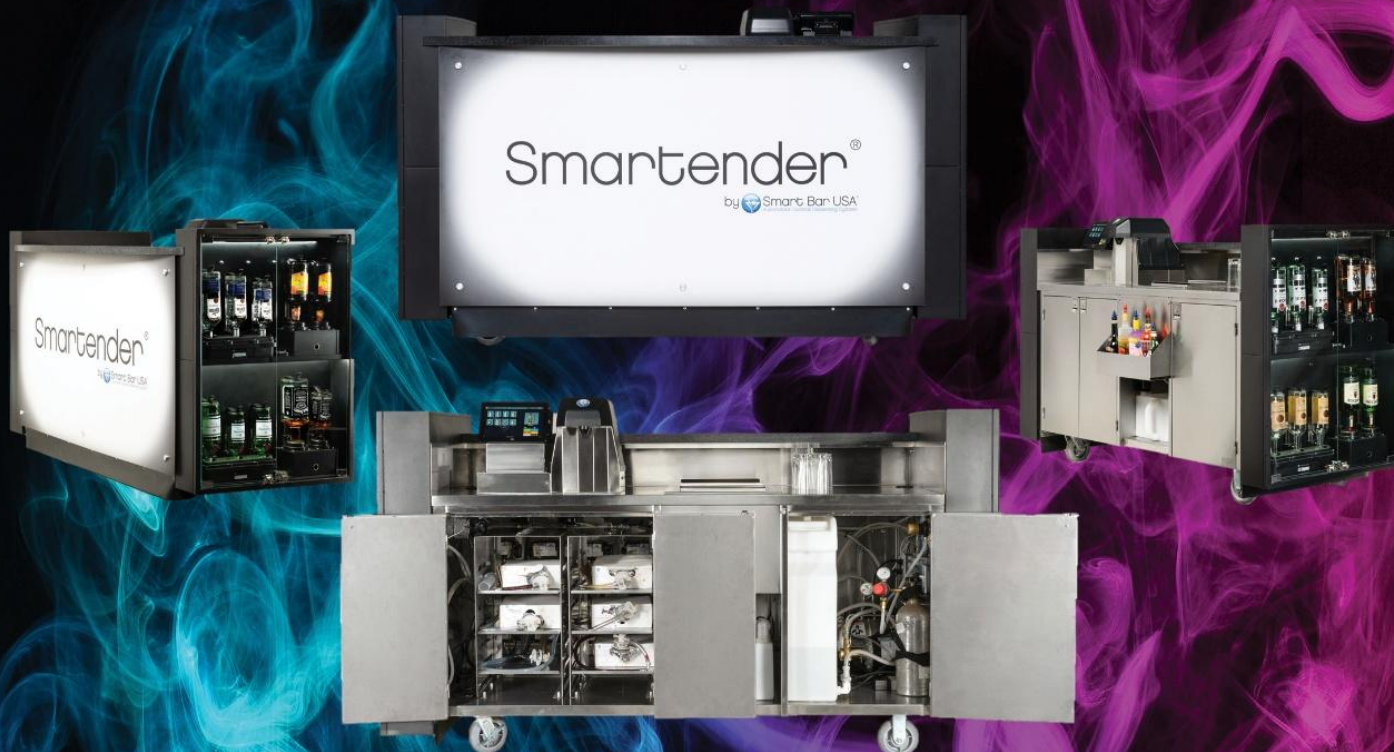

Smartender® GO

“ THE POWER OF PORTABILITY ”

The Smartender GO is the most advanced automated bar station, offering a completely self-contained, mobile beverage solution.

Designed for high-volume venues that need immediate beverage infrastructure at a fraction of the cost, the Smartender GO delivers the ultimate blend of pouring power and operational convenience.

Key Features

- Fully self-contained unit with onboard water tank, water filter, waste tank, liquor supply, mixer supply, ice bin, CO2, and carbonator.
- Accessory outlets within cart for point-of-sale station and printer.
- Adjustable mixer bay designed to hold most bag in box sizes. Fits up to 6 standalone 2.5 and 5 gallon bag-in-boxes.
- Patented pouring nozzle provides high quality product taste for all ingredients.
- Advanced drink modifier recognition to interface with the most unique Point of Sale setups.
- Remote machine management and reports via Web Manager portal, while machines are online.
- Simultaneous pouring of liquors and mixer result in an average pour time of 4 seconds per drink.
- Accurate liquor pours to within 1/16th of an ounce.

Smartender® Self Serve

“ SELF SERVICE MADE EASY ”

The Smartender Self Serve brings cocktail convenience to any establishment looking for self service beverage solutions.

The Smartender Self-Serve is a fully adaptable ecosystem designed for ultimate service flexibility. It easily handles simple QR-code receipt scanning from remote order points, full standalone payment configurations, or advanced third-party voice and facial recognition integrations.

Available in mounted and portable configuration packages including single and twin head dispenser and terminals.

Smartender Self Serve (Single)

Smartender Self Serve Duo (Twin Head)
