

# The OZEV grant scheme is changing

## EV Fan

The OZEV grant scheme is changing.

Owners of detached, semi-detached, terraced houses and bungalows will no longer be eligible from 31 March 2022.

The grant will instead be aimed at landlords of rental properties, and those living in leasehold flats.

The idea is to remove a key barrier to EV uptake in densely populated urban areas.

If you already have an installation booked with us then there is nothing to worry about.

If not then booking now would be sensible.

The last date we will be accepting OZEV grant applications will be **1.3.22**.

## Stay in the know

Choosing a charger can be tricky and that's why we created a page where people can [compare, leave reviews or read customer reviews](#).

[Compare chargers](#) ✓

## Charging at work

As an independent source, we are able to provide our customers with the best and most cost-effective solutions available from the widest range of leading charge point manufacturers.

From simple entry-level charge points to cutting-edge back-office managed systems.

We can advise on which are most suitable for your available budget.

APi will survey your location to find the most cost-effective way to install.

If you have a growing fleet of plug-in cars we can even offer load-balancing systems to enable more charging bays to be in use without the risk of overloading the available electricity supply.
