PIGMENT

Pigment for Private Equity

Alpha Alternatives

Plan, model and report across the entire Private Equity Lifecycle

From Actuals and Forecast Fund Models to Waterfall / Fee Automation and GP Carry Plan administration, Pigment replaces fragile spreadsheets and rigid legacy systems with one connected platform for bespoke Planning and Analytics Models, implemented and accelerated by Alpha Alternatives.

COMPLEX MODELLING CAPABILITIES FOR PRIVATE EQUITY

5 ManCo

- Workforce Planning
- Revenue Planning
- Corporate FP&A

Buyout

Growth Equity

Venture Capital

Secondaries

Co-Investment

GP Stakes

Continuation Funds

Fund of Funds

Connected Data

Connects directly to your source systems, market data feeds, and data warehouse. No more re-keying. No more reconciliation. Every model draws from the same governed data , across every fund, entity, portfolio and asset.

Collaborative Planning

Deal teams, fund accountants, and the CFO all work in the same model simultaneously. Workflow-driven approvals, full audit trails, and comments built in. Every assumption is visible, every change is tracked, and the version-control nightmare is over.

AI Native Planning

AI is native to the Pigment Platform. A network of specialized AI Agents works in harmony, analysing, modelling, and coordinating in real time or utilise MCP connectors to your in house LLM

Accelerated by Alpha

Alpha's Accelerator models provide 60–80% of a typical implementation out of the box, built from a decade of delivering EPM solutions exclusively in private markets. You get a working solution faster, at lower risk, delivered by the only specialist team focused on this space.

FASTER
Reforecasts in hours, not weeks

DEFENSIBLE
Governed formulas, full audit, no "black-box" Excel

SCALABLE
One platform across funds and strategies

AI-READY
Native AI & open to your AI Assistants

Talk to Alpha's Private Equity EPM team

We help PE managers and operators move from spreadsheets and legacy solutions to Pigment, with swift implementation timelines and with AI capabilities switched on from day one.
