**Jumping
Rivers**

Peace of mind, backed by expertise.

Scoping. Deployment. Maintenance. Support.

Design & Deployment

Whether you need to get a small team running quickly or require a scalable, enterprise-grade solution for long-term growth, **Jumping Rivers has you covered.**

We don't believe in one-size-fits-all setups—instead, we design infrastructure tailored to your specific needs, whether in the cloud, on-premise, or in containerised environments.

Our solutions are built on **proven architecture patterns and best practices to ensure security and efficiency.**

We'll collaborate with you to create a system that **evolves with your team and keeps your data workflows seamless.**

Support & Maintenance

Our Support & Maintenance service removes the burden of managing your Posit applications and Linux servers, so **you can stay focused** on building tools and delivering insights.

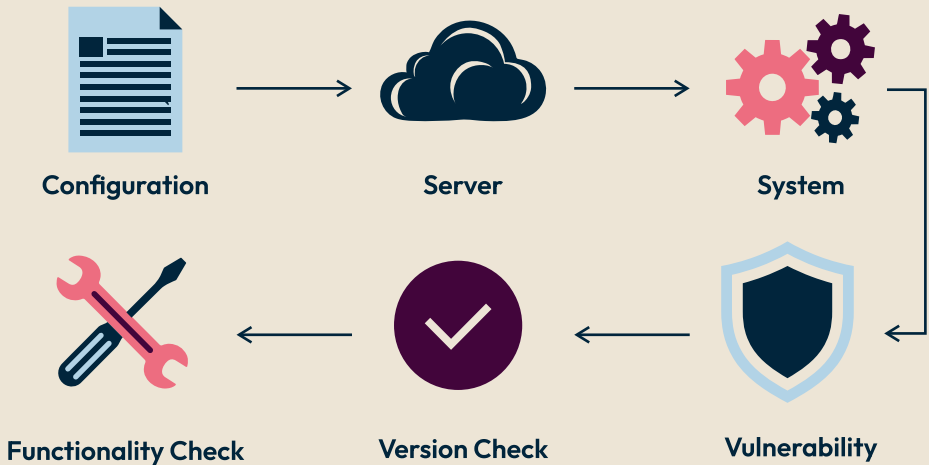

Think of us as your behind-the-scenes tech team—keeping systems secure, up-to-date, and running smoothly.

From round-the-clock monitoring and patching to backups, troubleshooting, and performance tuning, we handle the technical heavy lifting—**no stress, no surprises, and no need for an internal sysadmin team.**

How we help you dive deeper

Posit Health Check. Audit. Clarify. Secure.

What is it?

Do deployments unexpectedly fail?
Does Workbench time out for no reason at all? Are you concerned about the security of your server?

Then the Posit Health Check is for you! It's a full-featured audit of your Posit product. Checks range from server set-up to deployment of numerous applications on your Connect server.

Features:

- Expert review of your Posit Connect, Workbench, and Package Manager setup
- Focus on security and core functionality – aligned with best practices
- Ideal for teams who've recently deployed Posit products and want reassurance
- Includes automated and manual testing to assess system health

Get in touch

Let's talk about how we can help you get the most out of Posit.

"As a long-term partner of Posit, Jumping Rivers has been steadfast in their **commitment to help customers derive the greatest value from code-first data science**. Since our official partnership started more than 7 years ago, they have extended their offering to include the configuration, deployment, management, and maintenance of the Posit Team offering for customers looking to have a trusted partner on their advanced analytics journey."

- Tareef Kawaf, President of Posit PBC
