

Orchestrated Healthcare System Connectivity

Workato + Jade Jet360 connects EHR, CRM, and revenue systems to orchestrate compliant, real-time healthcare operations across the entire patient journey, from onboarding to outcomes.

Problem

Healthcare providers face fragmented systems, data silos, and manual processes that delay care, impact revenue, and increase compliance risks.

Solution

Workato and Jade deliver a secure, scalable integration layer with AI-powered orchestration for fast, compliant, and connected healthcare operations.

Results

- **Connected Care Workflows:** Orchestrates EHR, CRM, and RCM to streamline care and revenue ops.
- **Real-Time Health Access:** Connects telehealth, claims, and scheduling with real-time APIs.
- **Automated Compliance Intelligence:** Uses Genies to automate coding, pre-auth, and HIPAA monitoring
- **Patient360 Insight Engine:** Unifies Patient360 data for smarter care and operational decisions

Changing the Game.

Integration Speed

Accelerate healthcare integrations by 65% using Workato's low-code recipes and prebuilt FHIR APIs.

Smart Compliance

Cut compliance overhead by 85% with HIPAA-ready orchestration and AI-powered monitoring.

Revenue Uplift

Improve revenue performance by 30% through real-time claims, eligibility checks, and payment automation.

Virtual

Care Orchestration

Streamline virtual visits and RCM workflows with intelligent, real-time system connectivity.

Automated

Authorizations

Accelerate pre-authorization and medical coding using AI-powered Genies and low-code recipes.

EHR

Data Simplification

Reduce manual EHR input with seamless integration and automated data capture.

Real-Time Clinical

Intelligence

Deliver faster, data-informed decisions through unified insights across clinical systems.
