

Life Sciences Orchestration Accelerator

Orchestrate every phase of the life sciences journey with the power to connect clinical, lab, and manufacturing systems, the speed to move in real time, and the scale to support enterprise growth.

Problem

Life sciences organizations struggle with disconnected clinical systems, fragmented lab data, and time-consuming compliance processes.

Solution

Workato and Jade transform complexity across R&D, clinical, and compliance operations into opportunity through powerful, real-time orchestration that scales with your enterprise.

Results

- **Connected Trial Operations:** Unifies trial platforms and site data in real time to accelerate study execution.
- **AI-Driven Compliance:** Uses Genies to automate monitoring, reporting, and compliance insights.
- **Streamlined Validation:** Automates GxP workflows with built-in 21 CFR Part 11 and FDA support.
- **Scalable Lab Integration:** Seamlessly connects lab systems with pre-built, scalable integrations.

Orchestrated Workflows. Smarter Science.

Trial Velocity

Accelerate clinical trials by up to 35% through real-time orchestration across platforms and partners.

Compliance Efficiency

Cut compliance workloads by 50% with automated, auditable workflows powered by AI-driven Genies.

Deployment Speed

Deliver integrations 45% faster using Workato's pre-built connectors, recipes, and low-code orchestration tools.

Automated Safety Reporting

Streamline safety reporting with AI-powered Genies for real-time compliance and automation.

Connected Trial Sites

Orchestrate trial site data exchange to eliminate silos and accelerate collaboration.

Orchestrate Lab Efficiency

Reduce QC data processing time by 25% with intelligent lab system integration.

Accelerated QC Processing

Accelerate batch record workflows through seamless data orchestration across systems.
