VIRTUOSO PARTNERS

VALUE REALISATION ASSESSMENT

Know which automation and AI use cases are worth building.

A 2-hour consultation with our team turns your list of ideas into a clear readout of value, readiness and next steps, before you commit budget or build time.

Powered by Valuo

WHAT WE DO IN THE SESSION

01

Frame

Each use case mapped: how the process runs today, the outcome you want and who owns it.

02

Size

Value estimated with the source of every number shown, and cash kept apart from capacity.

03

Check readiness

Business and technical readiness rated, so blockers surface before anyone commits.

WHAT YOU GET

Your Use Case Readout

A written readout from the session, ready to take to your leadership team or board.

- ✓ **Value potential** for each use case, with its evidence
- ✓ **Strategic fit** against your priorities
- ✓ **Readiness** rated Green, Amber or Red, business and technical
- ✓ **The gaps to close**: data still needed and decisions to agree
- ✓ **Recommended next steps** and where to start

WHY IT MATTERS

Decide faster

A clear yes, not yet or no for every idea on the list.

Fund with confidence

A business case your finance team can trace.

Avoid surprises

Readiness gaps found before the build, not during it.

Prove the return

Baselines and owners set, so value can be measured once live.
