DCP CONSTRUCTION DIGITISATION SERVICES

Here's What They Say

“ DCP team goes through a great level of detail, with such a quick turnaround time: *It is incredible!* No one else would've been able to successfully implement Procore this quick.

KEN FUHRMAN,
Enterprise Account Executive - Procore Technologies

“ DCP was instrumental in the successful implementation of Procore. Not only did they understand our business and processes, but their interactive training approach gave our teams the confidence to use Procore.

AHMED SHAIK
Head of PMO, Center of Excellence - KCC

INCLUDES: Unlimited Inspection Templates!

Stop letting "cost-per-template" dictate your safety and quality standards. DCP will configure unlimited number of inspection templates, ensuring your Procore environment complies with the local regulations such as the Building Safety Act and BCAR requirements.

We help you digitise all of the templates you currently use: Whether it's a niche fire-stopping checklist or a new Gateway 3 requirement: We digitise, test, and deploy all templates, ensuring your site teams have the right tools to stay compliant.

Designed For Compliance

- + Deploy trade-specific inspections for every package, from fire-stopping to structural steel, without hitting a template limit.
- + Keeping you compliant, audit-ready, and ahead of the Building Regulator.

Partnership, Not a Paywall!

- + Digitise as many digital forms you have without worrying about escalating service fees or hidden variations.
- + Remove the "Cost-per-Template" barrier. Give us all your paper form inspection templates and we will digitise them on Procore.

Here is why it matters:

	Traditional "Hourly" Model	DCP Outcome-Based Model
Setup Cost	Variable; every new form comes at a cost.	Included; unlimited at a fixed-fee with no variations.
Site Adoption	Low; teams make do with generic forms to save money.	High; bespoke inspection forms for every trades/roles.
Coverage	Fragmented; gaps exist when digital forms are too expensive.	Complete; digital evidence for every construction activity.
Compliance	Low; compliance is limited by your implementation budget.	High; safety and quality are never out of scope.
