Strengthening the Ecosystem, Not Replacing It

Secure In-Store Orchestration

- PointConex™ no-code proxy for card-present transactions
- PCI-validated P2PE across 125+ devices / 17 manufacturers
- Processor-agnostic orchestration
- Reduces PCI scope and simplifies implementation

- **62% of organizations say their biggest risk is data that moves across systems they don't control.** (Cisco)
- **79% of organizations believe tokenization reduces breach impact better than encryption alone.** (451 Research)
- **84% of consumers say they are more loyal to brands that protect their personal data.** (Cisco Consumer Privacy Report)

Global Tokenization & Data Ownership

- Industry-leading multi-PSP payment tokenization
- Secure data portability across digital channels
- PCI-compliant vault + 5B+ tokens managed
- Strengthens PHI/PII and payment data protection
