

Brand Consistency Simplified: Accessing OpenAsset Images in Templafy Connector

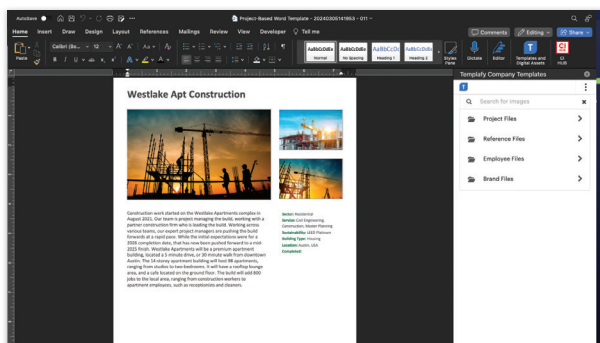

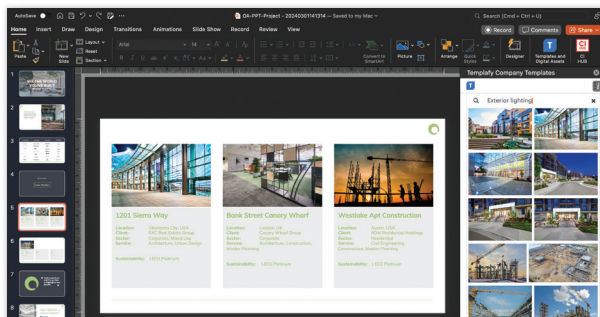

PRODUCTS

SOURCE

Templafy helps companies with brand activation, document governance, and repetitive document creation, no matter where employees work. AEC companies trust OpenAsset as the preferred solution to store, organize and find marketing images. The connection between platforms allows images to be accessed from within MS Word and PowerPoint, enabling employees to build documents quicker.

Key Benefits

- Empower employees with direct access to images, icons, and logos within MS Office applications.
- Reduce time spent searching and switching between platforms, increasing efficiency.
- Maintain control over brand assets and ensure consistency across marketing and business documents.

What the Integration Delivers

- **Image Access in MS Office:**
Locate images directly from within PowerPoint or Word documents, saving time and effort.
- **Intuitive Drag-and-Drop:**
Place images directly into pre-designated image placeholders in PowerPoint and Word desktop with just a few clicks.
- **Simplified Brand Compliance:**
Access and utilize brand-approved files, regardless of OpenAsset expertise, promoting brand consistency.
