Automation for All Your Security and Compliance Cases

- **Put Personnel and Device Compliance on Autopilot:** Automatically identify personnel and devices in your organization that are not compliant and upload evidence for their respective compliance categories
- **Automatically Upload Evidence to a Control:** Automatically upload evidence from a local or external source to a control in Drata - you can even push evidence from tools that don't currently integrate with Drata, avoiding any gaps in evidence collection
- **Access Monitored Test Data:** Get granular access to all your test data in Drata and identify failing resources for a complete picture of your security posture

Torq + Drata Benefits:

- **Reduce manual processes:** Streamline manual evidence collection with Drata by building automatic workflows in Torq
- **Customize automation for your needs:** Design workflows for Drata using Torq that fit your organization's structure, tech stack, and processes
- **Leverage pre-built workflows:** Utilize pre-built workflow templates from Drata in Torq and reduce your time to value
- **Say goodbye to coding:** Build automatic workflows in Torq without the need for coding, scripting, or even understanding the technicalities of REST APIs

About Torq

Torq is the cybersecurity force multiplier. Its comprehensive security automation platform unifies and automates the entire security stack to deliver unparalleled protection and productivity. Torq drives maximum value and efficiency from existing security investments. It supercharges security teams with powerful, easy-to-use no-code workflows that reduce manual tasks and integrate low-code and full-code tools, freeing security professionals from Fortune 100 Enterprises to cutting-edge startups to focus on higher-value strategic activities.
