

Redirect Your Links to the [Right Address!](#)

Redirect Your Links to the *Right Address!*

What is GoRedirect?

GoRedirect is a tool developed to solve link issues in Instagram stories. Due to Meta Browser errors, users are often redirected to the homepage instead of the desired page in the mobile app. Our solution provides brands with special links that can redirect to the mobile application page without being affected by browser errors. This allows brands to offer a more effective and seamless experience in their Instagram stories.

How Does GoRedirect Work?

To use this system, you need a domain address. The created domain address needs to be directed to the specified IP address. At this point, you can provide the domain, or we can also provide it.

3 Steps to GoRedirect:

1. Sign Up and Discover:

Sign up for GoRedirect in just a few steps and immediately discover the ease of optimizing your mobile links!

2. Add the Link and Start Using:

Add your Universal Link and start using it immediately to redirect your mobile users to the correct pages!

3. You're Ready!

In the final step, click the create URL button to create your link for directing to the correct page in your mobile application. Now you are ready!

Redirect Your Links to the **Right Address!**

Why GoRedirect?

It provides brands with special links that can redirect to the mobile application page without being affected by browser errors. This way, brands can offer a more effective and seamless user experience in their Instagram stories. For example:

Old adjust link: https://your.universallink/xxxxxxx?adj_t=xxxxxxx&adj_deep_link=qqkl.adj.st%3A%2F%2Fxxxxxx New link with tool: <xxx.domain.com/redirect/example-link> will be shorter and more organized.
