

Centralize Your Data and Images with the OpenAsset & Deltek Vantagepoint Connector

OpenAsset is a project-based Digital Asset Management (DAM) solution that helps users to store, find, and use their marketing images more easily. With the seamless integration provided by OpenAsset, users can access digital assets and their accompanying data at any time and from any workflow, ensuring optimal efficiency and productivity. Firms can sync project and employee data from Deltek Vantagepoint into OpenAsset to auto-populate fields and keywords.

Key Benefits:

1. Leverage your existing data in Deltek Vantagepoint to tag your projects and images at scale in OpenAsset
2. Sync your project data to OpenAsset project fields and keywords
3. Sync your employee data to OpenAsset employee fields
4. Combine your Deltek data with OpenAsset images to easily create InDesign documents

What the Integration Delivers:

Filter on OpenAsset Approved Projects

Designate which projects are synced to OpenAsset.

On-Demand Sync Functionality

Control when projects sync with the click of a button for ad hoc needs.

Map Deltek Vantagepoint Project Info

Automatically build out your project portfolio details and taxonomy by mapping to keywords and fields.

Map Deltek Employee Info

Automatically build out your employee portfolios by mapping subsets of personnel details to employee fields.

Automatically Map Deltek Employee Roles

The system will auto-generate employee experience in OpenAsset based on project assignments in Vantagepoint.

Daily Sync

The system will automatically sync daily to keep projects and their information updated.

Create Templated Proposal Documents

Quickly generate relevant templated project and employee experience documents in InDesign & Word.

"Connecting with Deltek has been great, because we no longer have to manually update the photos by copying/pasting information from OpenAsset."

— The Dewberry Team
