

CYREX

SECURITY TESTING FOR ONLINE GAMES

Cyrex, a leading cybersecurity firm with over a decade of experience, empowers game studios, publishers, and developers worldwide to build and deploy secure online game titles.

The online gaming industry thrives on innovation, but with constant growth comes evolving security threats. Vulnerabilities reside within code, cloud infrastructure, online & multiplayer services opening up opportunities to malicious actors for cheating and hacking.

Cyrex's unique penetration testing offering identifies and mitigates vulnerabilities before they impact your player's experience, brand reputation, and or revenue streams.
