

GET THE BEST OF SCALABLE INVENTORY MANAGEMENT AND AUTOMATED RECONCILIATION

Take your efficiency to the next level with a real-time view of the whole inventory cycle and seamless automated reconciliation across multiple platforms.

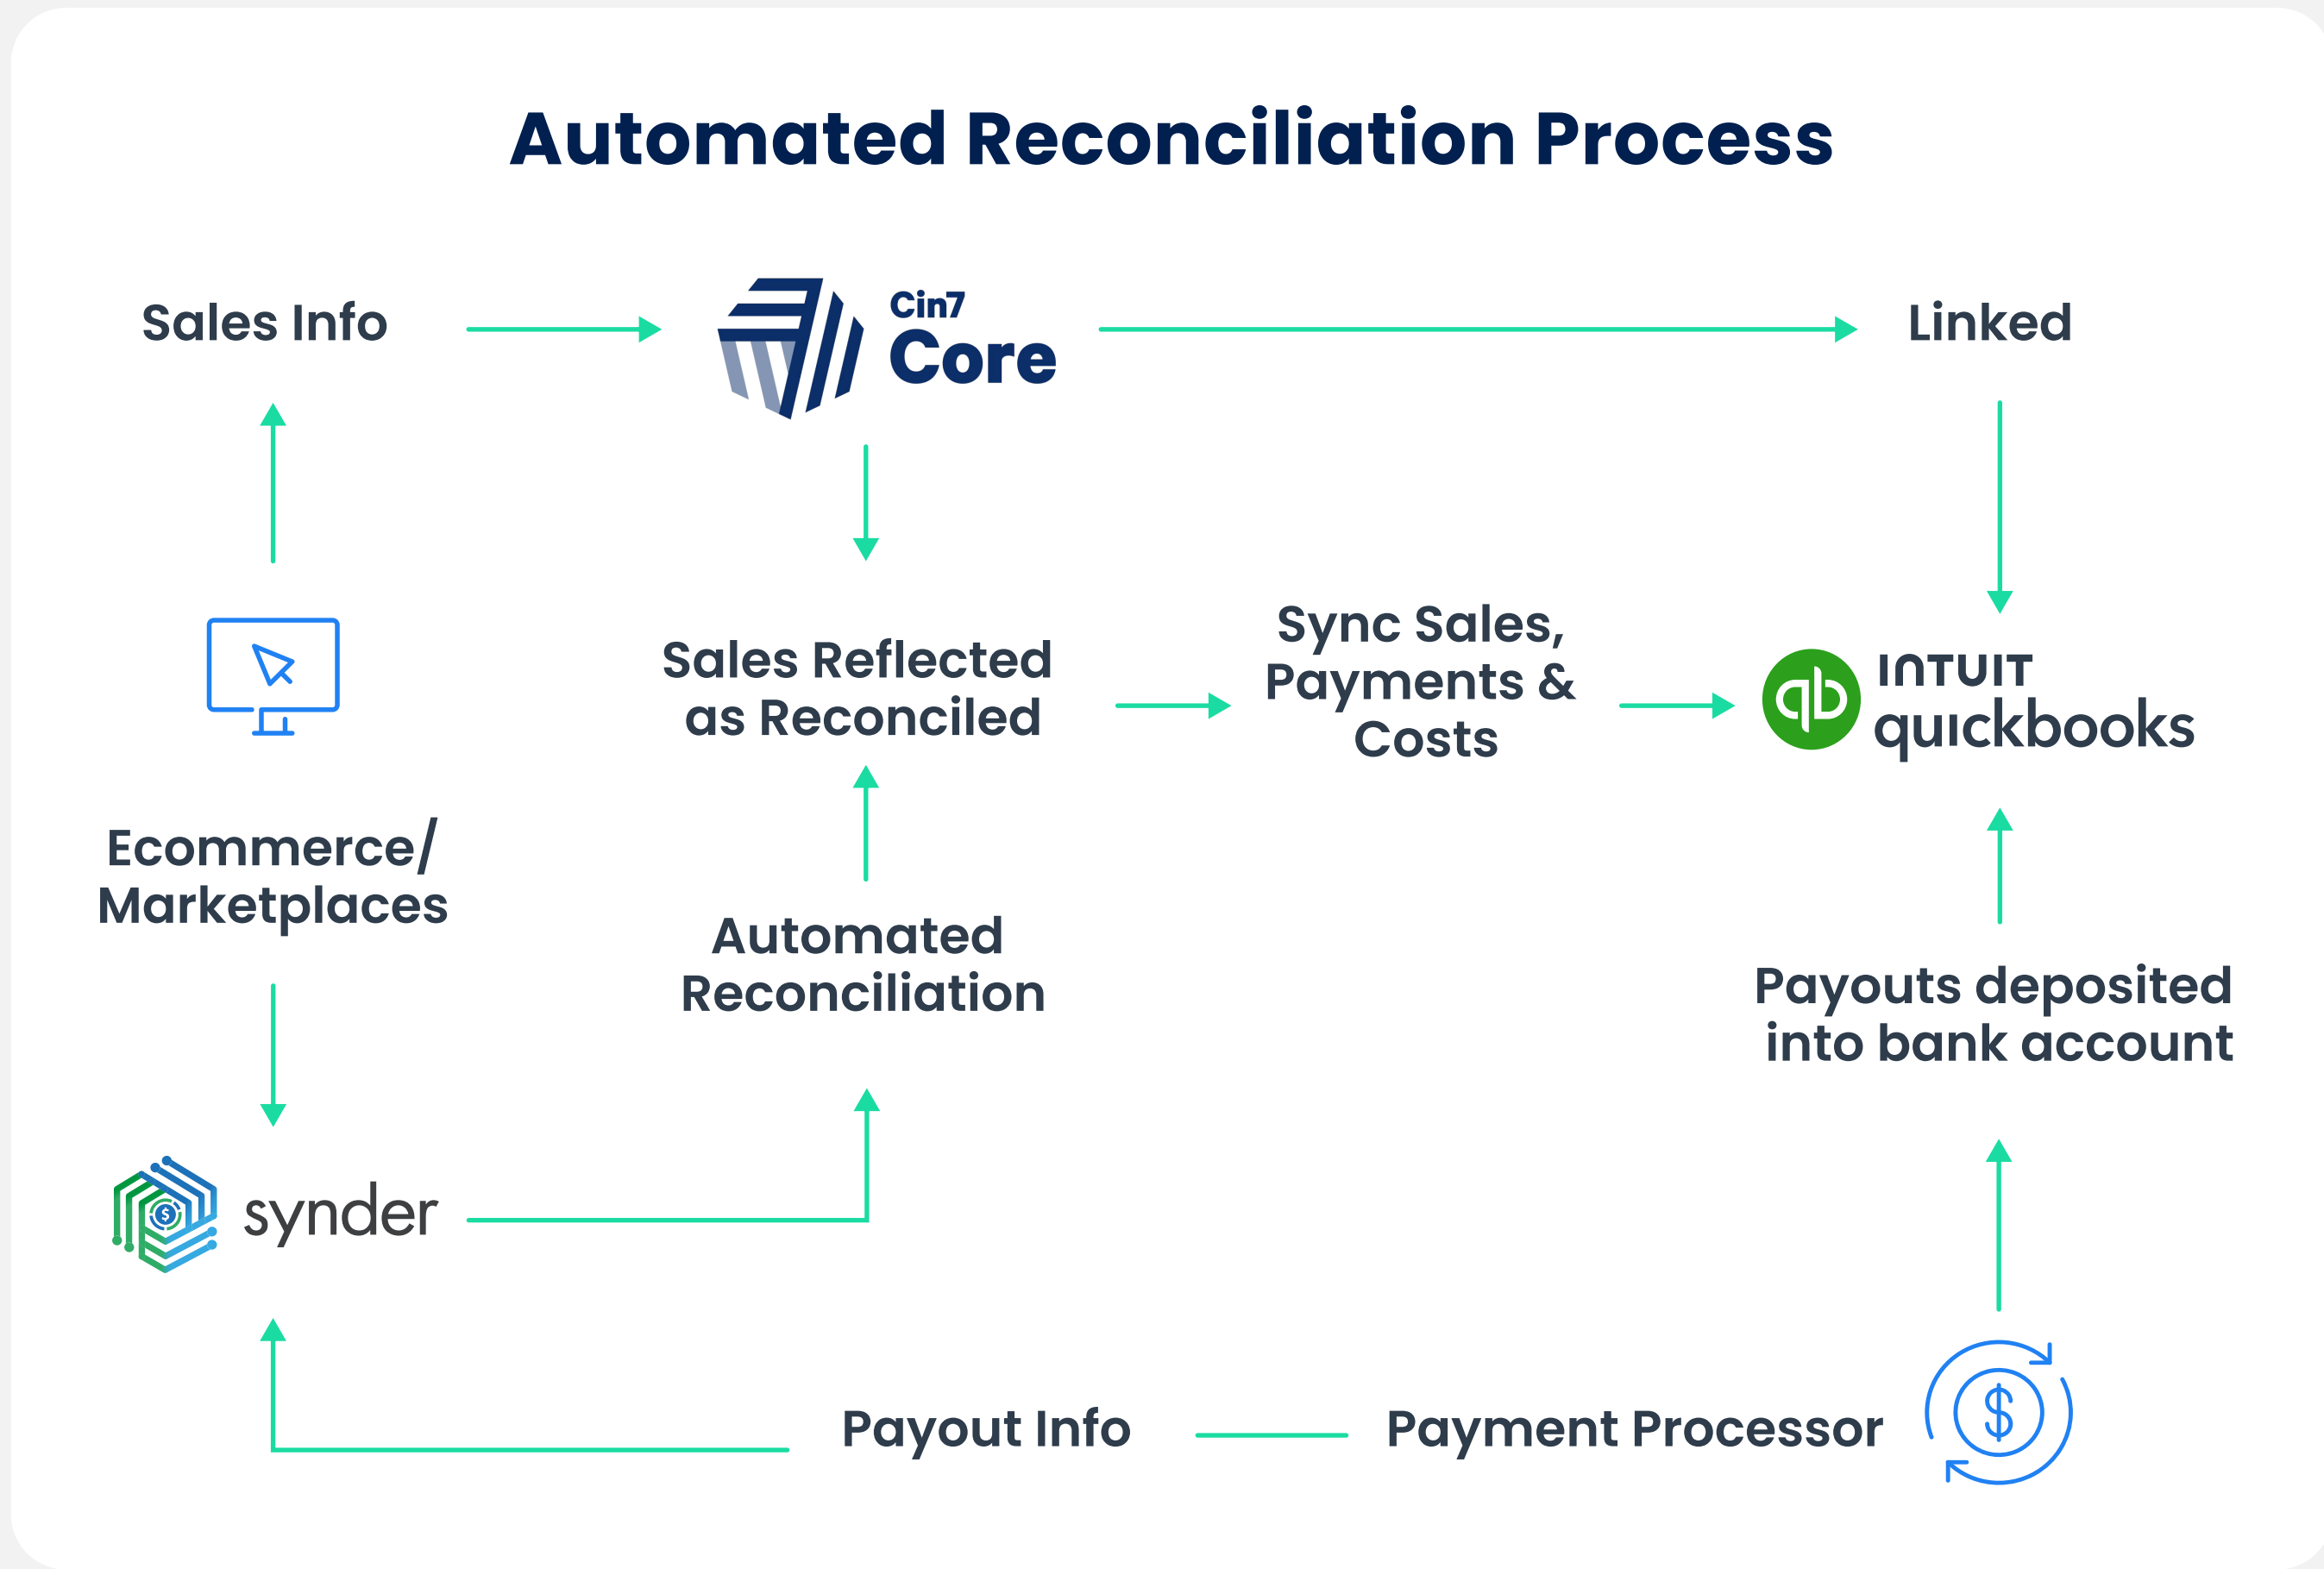

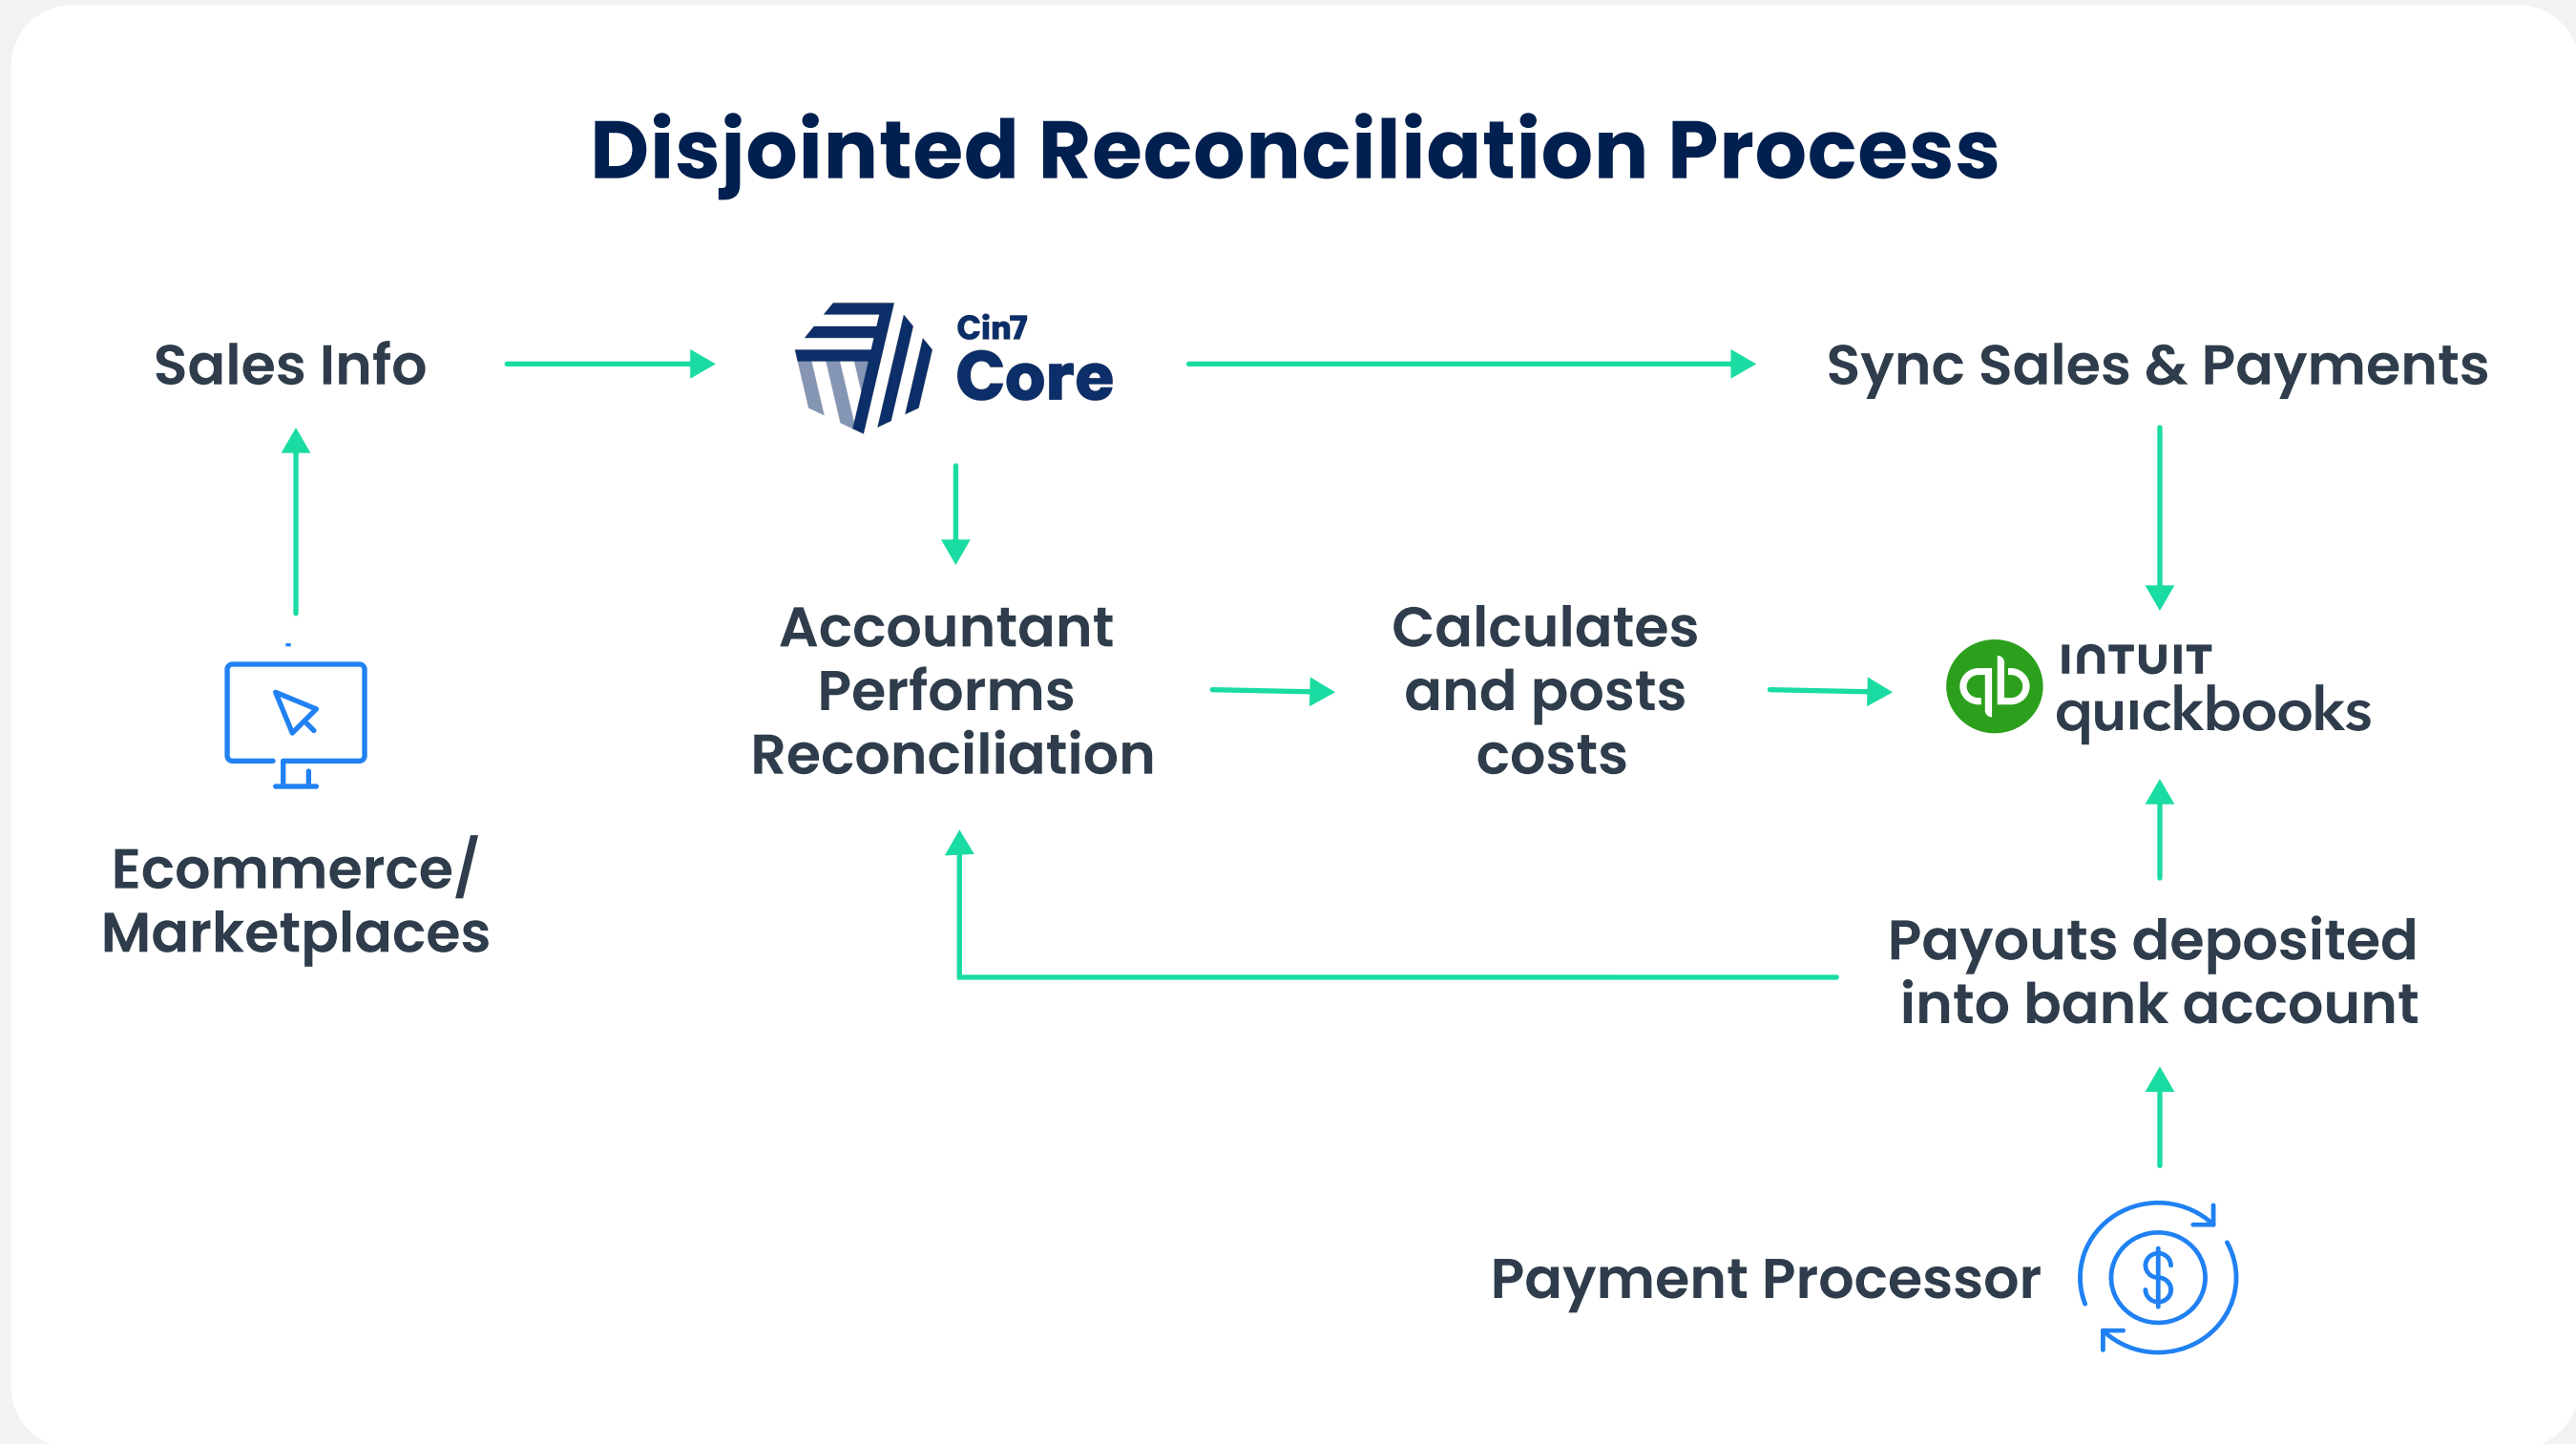

CHALLENGES

Businesses that sell products online encounter a slew of challenges when it comes to reconciling sales transactions across different channels and payment platforms. The painstaking process of manual data entry frequently leads to overlooked bookings, incorrect mappings, and calculation errors.

CIN 7 CORE AND SYNDER INTEGRATION

The seamless integration of Cin7 Core and Synder automates the reconciliation process in real-time and ensures that your accounting records are consistently up-to-date.

BENEFITS

- > **Automated reconciliation**
Enable real-time automated reconciliation and get access to up-to-date accounting records anytime.
- > **Time and effort efficiency**
Automate data synchronization to get rid of manual entry, thereby saving time and minimizing mistakes.
- > **Enhanced accuracy**
Maintain consistent and accurate data across all systems in use, preventing discrepancies.
- > **Improved financial health**
Get more time to focus on value-added activities like monitoring cash flow and profitability.

ABOUT SYNDER

Synder helps online merchants, SaaS businesses, and accounting firms optimize processes and bring efficiency to their workflows by automating online sales bookkeeping, multi-channel reconciliation and revenue recognition. Synder integrates with 30+ sales platforms and payment gateways, allowing you to consolidate transaction data in a single source of truth, your accounting system.

With Synder, you'll get:

Seamless invoice to payment matching

Synder accurately matches ecommerce orders paid with external payment providers, automatically closing invoices in your ERP or accounting system.

Flawless fees and payout sync

Synder syncs external payment processing fees (e.g., Shopify + PayPal) and payouts so your books are reconciliation ready at any time.

Proper tax recording

Synder accurately records taxes from online sales platforms, keeping the split of taxes by state and agencies, and syncs tax withheld to your books.

No-worry automated reconciliation

Synder makes sure you can smoothly reconcile multi-channel sales, automatically categorize P&L and record taxes.

ABOUT CIN7

Cin7 provides Connected Inventory Performance – cloud-based inventory management software that gives growing product businesses an automated and real-time view of the entire inventory lifecycle. Cin7's products, Core and Omni, natively integrate with over 700+ applications, so you can consolidate, streamline, automate, and scale your inventory operation from one place.

With Cin7, you'll get:

Connected inventory performance

Cin7 connects the entire product ecosystem and unites inventory and order data across all platforms in use to see the inventory cycle all the way through.

Powerful business tools

Cin7 drives performance with unparalleled solutions for effective inventory management, purchasing, warehouse management, sales and order fulfillment.

Enhanced data accuracy

Cin7 syncs COGS to QuickBooks, while Synder handles sales transactions, ensuring 100% accurate data in your books.

Focus on scaling and growing

Cin7 simplifies selling in new channels and territories, leveraging over 700 pre-built integrations, which fuels accelerated growth.
