

Purchase, receive, with Cin7 Core. Pay with Airwallex.

Airwallex and Cin7 have partnered to bring the first Xero-integrated embedded B2B payment solution for Core users. *Quickbooks Online coming soon.*

You can now select “Pay with Airwallex” to make vendor payments globally at the click of a button, all without leaving your existing procure-to-pay workflow in Core.

Challenge

Today, Cin7 Core users need to pay vendors, often across borders. Despite this, there is no current solution to facilitate payments within the platform.

Users need to go off-platform and pay via their standard accounts payable process - typically a manual and fragmented process with large room for human error, especially with global payments.

Solution

“Pay with Airwallex” directly integrates to existing Cin7 Core workflows, allowing users to leverage Airwallex’s industry-leading FX rates, payout network coverage and AP-management tools such as approval workflows and customisable user permissions.

Together, users can streamline their end-to-end financial operations through cost and time savings.

Global payout coverage, at market-leading rates

Fast, local payouts to 150+ countries and regions, in 60+ currencies.

Seamless 2-way syncs with accounting platforms

Airwallex, Cin7 Core and Xero sync together seamlessly. *Quickbooks Online coming soon.*

Secure payment flows

Multi-layer approval workflows, user permissions and 2FA.

Access to an all-in-one business account solution

Help your business grow and operate globally, with online payments, borderless cards, expense management and more.
