quire™

TECHNICAL REPORTING SIMPLIFIED

Why choose Quire TRM™?

In the end, an engineering firm may be judged by its final deliverable: technical reports. Yet in many firms, the reporting process is not comprehensively managed or measured. Quire Technical Report Management (TRM) changes that overnight. Transform your reporting efficiency, consistency, and quality across all service lines — while providing a better experience for your teams.

A proven solution

Our customers have produced more than one million reports on hundreds of topics. And we're top-rated by our users on Capterra.

Capterra SHORTLIST 2024 · Capterra BEST EASE OF USE 2023 · Capterra BEST VALUE 2023 · Capterra 4.9

What you can expect

- Spend up to 70% less time per deliverable.
- Handle more work without adding people or sacrificing quality.
- Drive higher profit from a function most companies love to hate.
- Deliver the consistency your clients expect, without the hassle.
- Eliminate drudgery and unleash your team's full potential.
- Bottom line, happy teams and happy customers — full stop.

Transform your technical report writing and delivery capabilities with Quire Technical Report Management™

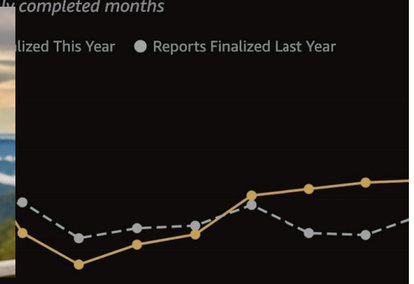

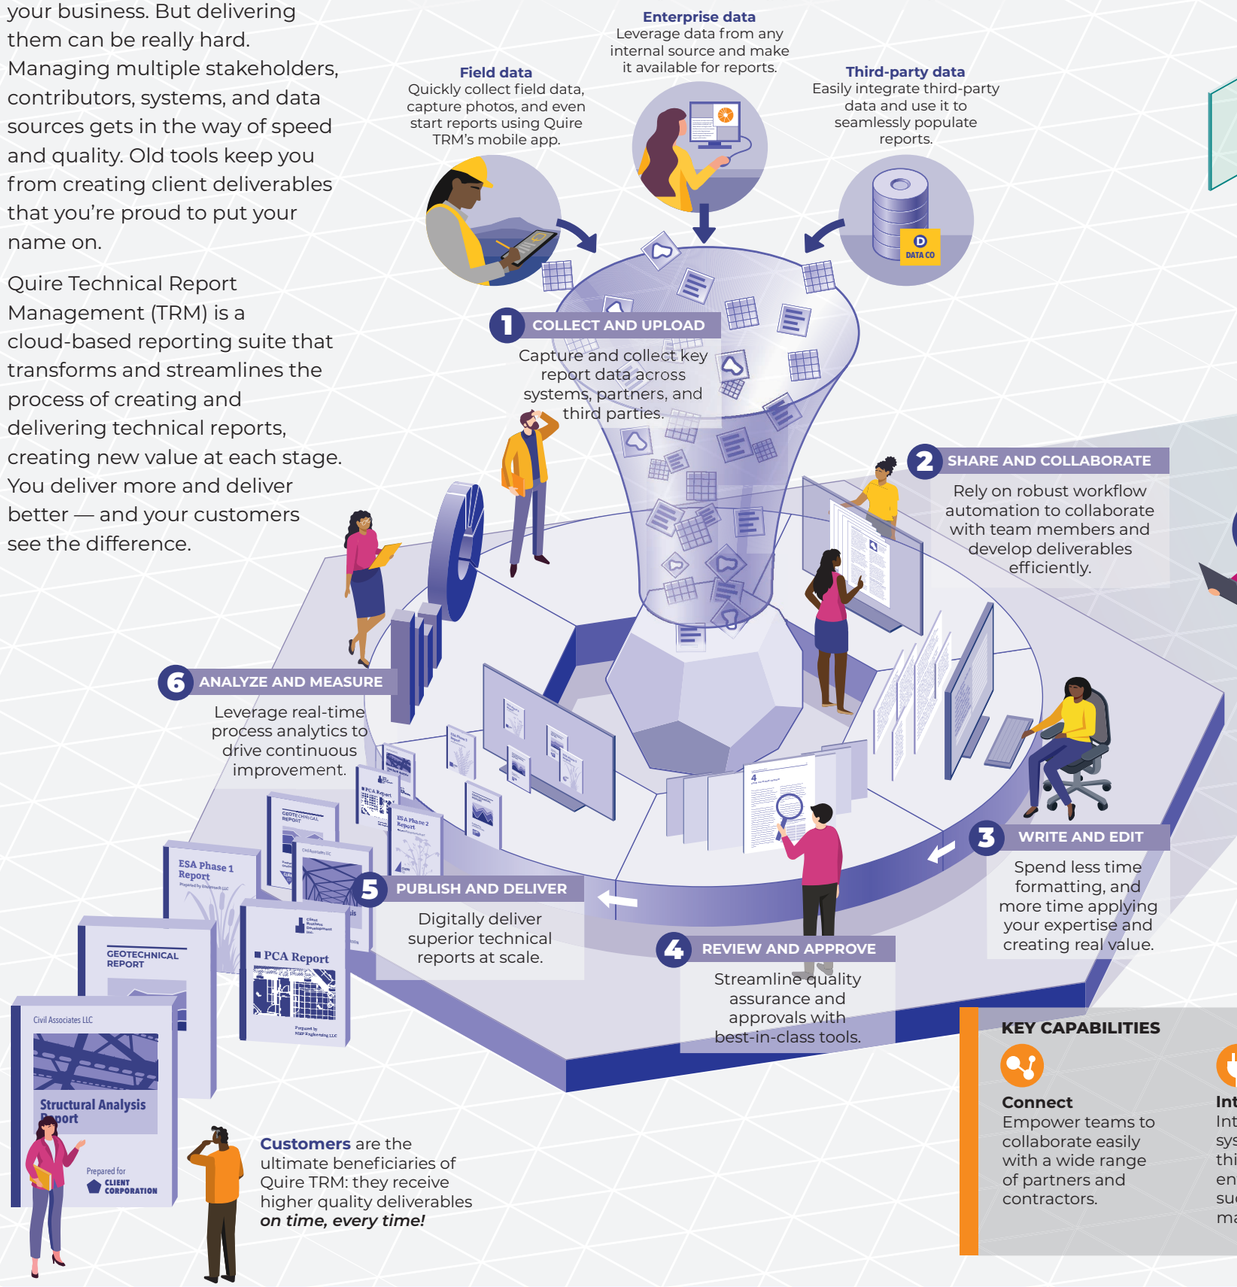

Introducing Quire TRM Transforming technical report production

Your engineering firm doesn't just provide services — it also provides knowledge. And technical reports are a big part of your business. But delivering them can be really hard. Managing multiple stakeholders, contributors, systems, and data sources gets in the way of speed and quality. Old tools keep you from creating client deliverables that you're proud to put your name on.

Quire Technical Report Management (TRM) is a cloud-based reporting suite that transforms and streamlines the process of creating and delivering technical reports, creating new value at each stage. You deliver more and deliver better — and your customers see the difference.

THE QUIRE TRM CYCLE

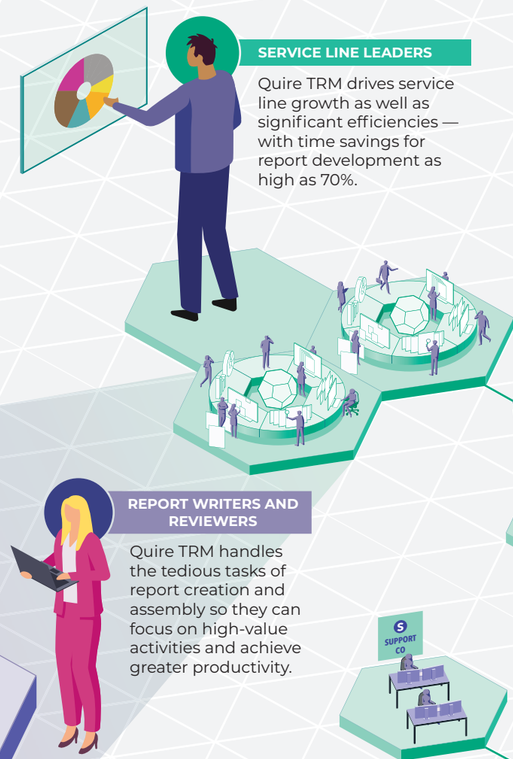

Quire TRM is an end-to-end, closed-loop platform that lets you efficiently manage the entire technical report lifecycle, from creation to delivery — helping your business grow.

Customers are the ultimate beneficiaries of Quire TRM: they receive higher quality deliverables ***on time, every time!***

BENEFITS AT ALL LEVELS

Quire TRM delivers benefits for owners, the C-suite, service line leaders, and report writers — your team will love you for it!

SERVICE LINE LEADERS

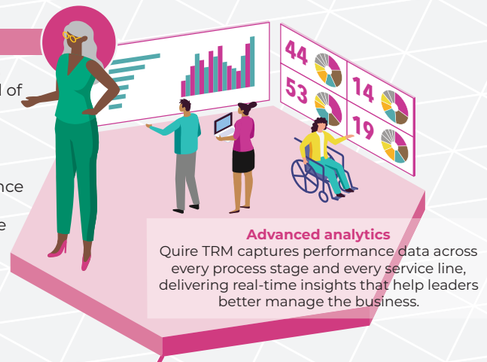

Quire TRM drives service line growth as well as significant efficiencies — with time savings for report development as high as 70%.

REPORT WRITERS AND REVIEWERS

Quire TRM handles the tedious tasks of report creation and assembly so they can focus on high-value activities and achieve greater productivity.

THE C-SUITE

Quire TRM provides visibility and control of the technical deliverable process across the entire business — with real-time performance metrics for the business, the service line, and all users.

Advanced analytics
Quire TRM captures performance data across every process stage and every service line, delivering real-time insights that help leaders better manage the business.

One platform across all service lines
Quire TRM makes it effortless to share assets, leverage processes, maintain standards and ensure consistency.

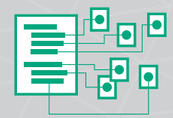

Team and partner externally
Service lines can easily work and share templates, reports, and information with partners and contractors on projects.

POWERFUL TOOLS

Create reports fast and streamline your process through advanced tools that ensure consistency and give you flexible control over all of your deliverables.

WordBank speeds report writing and reduces errors by leveraging approved language across your teams.

Flexible report structure means you can turn on or turn off sections of an entire report, or rearrange sections by dragging and dropping them within the table of contents.

Workflow automation lets you effortlessly organize activity and handoffs between team members to match how you work, and then automate it.

KEY CAPABILITIES

Connect
Empower teams to collaborate easily with a wide range of partners and contractors.

Integrate
Integrate with internal systems, data sources, third parties, or enterprise platforms such as ERP, project management, or CRM.

Analyze
Perform advanced analyses and benchmarking on every aspect of the process — by report type, service line, portfolios, process stage, or even user.

Apply AI
Improve your processes, summarize report data, and discover fresh insights across all your technical report deliverables.

Standardize
Maintain consistency of deliverables across the business through the use of optimized templates and defined workflows.
